# PREFACE

**History of the Collegiate.** WEBSTER'S NEW COLLEGIATE DICTIONARY is an entirely new book — newly edited and typeset and presented in a new format. It will, however, have for many persons the characteristics of an old friend; for it is but the latest member of the century-old MERRIAM-WEBSTER family. For many years MERRIAM-WEBSTER dictionaries have formed a series, in which the unabridged dictionary is the parent work and the COLLEGIATE DICTIONARY the largest abridgment. From each successive revision of the unabridged work new abridged books have sprung. In 1898 the first edition of the COLLEGIATE appeared. Its size, appearance, typography, and, above all, its wealth of material and scholarly presentation quickly won for it a high place in the regard of both general reader and scholar. In 1910 a second edition appeared, followed by new editions or revisions in 1916, 1931, and 1936. This NEW COLLEGIATE, in preparation for the past four years, incorporates the best of the time-tested features of its predecessors.

**Scope and Format.** The general content and over-all plan of the previous edition (WEBSTER'S COLLEGIATE DICTIONARY, *Fifth Edition*) have proved so well adapted to the needs of its users that any attempt to change its essential character and form seemed inadvisable. The editors felt, too, that there were relatively few entries, both in its main vocabulary and in the special sections, that could be omitted without loss to the user of WEBSTER'S NEW COLLEGIATE. At the same time, there were many new terms and meanings, many older terms and meanings of increasing importance or frequency, many abbreviations, and many proper names that must be added in a new edition. The problem was how to retain most of the material of the previous work while adding material essential to the new book without markedly increasing its physical size. The new format of the present book is the answer. The wider page, with its wider column, has enabled the editors to achieve this dual aim within a handy-sized volume.

**Typography.** The type faces used in this book are those of the NEW INTERNATIONAL, *Second Edition*, for which they were carefully chosen, after extensive experimenting, for their appearance and readability. These type faces have stood the further tests of time and use in the previous edition of the COLLEGIATE.

**The General Vocabulary.** Once again the vocabulary of the COLLEGIATE has been selected to meet the needs both of the college student and of the general reader seeking clear and accurate, but not encyclopedic, information. Every entry and every definition of the previous edition have been reviewed, and many of them have been revised to incorporate additional, often new, information or to effect improvements in the former presentation. The definitions have for the most part been based on the most recent available information contained in the latest printings of the parent work, WEBSTER'S NEW INTERNATIONAL DICTIONARY, *Second Edition*, with such modifications or adaptations as are required by the smaller scope of the COLLEGIATE. Wherever they are needed and, indeed, as freely as possible within the limitations of the space, phrases and sentences have been given that illustrate the definitions. The literary vocabulary contains many additions, consisting principally of new terms and meanings and some older ones of increased importance or frequency, the inclusion of which is often the direct result of suggestions from users of the previous edition. The NEW COLLEGIATE follows the practice of its predecessors in including only a limited selection of slang, dialectal, and obsolete terms and meanings. Since behind the present work are all the vast resources of the NEW INTERNATIONAL, *Second Edition*, containing some 550,000 vocabulary entries, the problem has been one of selection of terms to be included here. Usefulness has been the criterion.

**Special Subjects.** The greater emphasis on the vocabularies of technical and scientific fields, which was perhaps the most noticeable difference between the previous edition and earlier COLLEGIATES, has been continued in this NEW COLLEGIATE. The wealth of information prepared by the 207 consulting editors for the NEW INTERNATIONAL, *Second Edition*, has been freely drawn

upon and a great deal of new material has been added. Many of the new definitions have been specially prepared or reviewed for the present work by various members of this group of consultants and by others, particularly Dr. Robert A. Hall, Jr., Associate Professor of Linguistics at Cornell University, Dr. Ralph Harper, Instructor in English at Harvard University, Dr. James A. Hootman of the National Advisory Committee for Aeronautics, and Dr. Hans Kohn, Professor of History at Smith College.

In the selection of newer terms for inclusion in this book the important contributions to the language resulting from World War II play a major part. Such terms include not only those in the military field (such as *bazooka*, *blitzkrieg*, *foxhole*, *jeep*, *kamikaze*, *Panzer*, *roadblock*) but also those in many other fields, such as aeronautics, chemistry, electronics, nuclear physics, and medicine.

**Trade-marks.** Public interest in the status, the pronunciation, and the application of many terms originally coined for use as trade-marks makes such terms a matter of lexical concern. In a dictionary of this scope, however, it is possible to include only a limited number of those trade-marks most likely to be sought by the average dictionary user. All entries suspected of being trade-marks have been investigated in the files of the United States Patent Office at Washington, D. C., and those which the evidence showed to be trade-marks have been defined as such. The inclusion of a term in this dictionary is not, however, to be taken as an expression of the publishers' opinion as to whether or not it is subject to proprietary rights, but only as an expression of their belief that such a term is of sufficiently general use and interest to warrant its inclusion in a work of this kind. No definition in this dictionary is to be regarded as affecting the validity of any trade-mark.

**Presentation of Material.** Although the presentation of the material conforms to accepted dictionary practices and will in general offer no difficulty to most users of this book, occasional details may raise questions requiring precise answer. The editors, with the help of users of the previous edition, have tried to anticipate and answer all such questions in the section of *Explanatory Notes*, pages xviii-xx. Every user of this book, even the experienced dictionary consultant, will gain much from a reading of these pages.

**Order of Definitions.** In general the order of definitions follows the practice of the NEW INTERNATIONAL, where the earliest ascertainable meaning is placed first and later meanings are arranged in the order shown to be most probable by dated citations and semantic development. Technical senses, except in a few cases where they are essential elements in this pattern, are placed after nontechnical senses and are arranged according to the alphabetical order of their labels (such as *Bot.*, *Chem.*, *Med.*). This historical arrangement is of especial value to those interested in the development of meanings and offers no difficulty to the user who is merely looking for a particular meaning.

**Pronunciation.** The pronunciations given in this dictionary are based on those of the NEW INTERNATIONAL, *Second Edition*, and reflect the large body of firsthand information specially gathered for that work from scores of persons in all parts of the United States and elsewhere in the English-speaking world. The pronunciations of the individual entries in the general vocabulary and in the special sections are given in a phonetic alphabet that can be readily understood. A concise key to this MERRIAM-WEBSTER phonetic alphabet is printed at the front and back of the book, just inside the covers, where it can be found most easily and quickly. Users particularly interested in pronunciation are urged to read the *Guide to Pronunciation* (pages vii-xvii), which not only supplements this key by explaining fully each symbol used in the pronunciations but also discusses in some detail many general matters of pronunciation. This material was condensed by Dr. John S. Kenyon, eminent authority on pronunciation, from the fuller treatment prepared by him for the NEW INTERNATIONAL, *Second Edition*.

**Etymologies.** For vocabulary entries retained from the previous edition the etymologies, with such changes as are required to reflect recent information, are taken over from that book, for which they were condensed from those of the NEW INTERNATIONAL, *Second Edition*. These etymologies were prepared by Dr. E. E. Thompson of the editorial staff in consultation with Dr. Harold H. Bender of Princeton University, chief consultant in etymology, who has written or supervised the writing of the etymologies of new entries as well.

**Synonyms.** Brief articles discriminating from one another words of closely associated meaning have long been a valuable feature of the COLLEGIATE. In the present book the number of these articles has been increased. The articles, adapted from the fuller treatments in WEBSTER'S DICTIONARY OF SYNONYMS, were prepared by Miss Rose F. Egan, who had a major part in the writing of that book.

**Pictorial Illustrations.** The wide scope of illustrations that was a feature of previous editions of the COLLEGIATE has been retained in this new work. Many new illustrations have been prepared especially for this work. In general the aim has been to include illustrations not for their decorative quality but for their value in clarifying definitions.

**Supplementary Features.** Except for the section of *Foreign Words and Phrases*, the material of which has been incorporated in the general vocabulary of this book, the supplementary features of the previous edition have been retained.

The *Pronouncing Gazetteer* gives the spelling, syllabic division, and pronunciation of over ten thousand names, a marked increase over the number listed in the previous edition, and continues to provide information on location, political status or ownership, population, and other statistics (such as length of rivers, height of mountains, area of political divisions, lakes, etc.) in the concise form familiar to users of the COLLEGIATE.

The *Biographical* section gives the spelling, pronunciation, given names, dates, nationality, and a brief indication of achievements or sphere of activity for a selected list of names of persons, ancient and modern, of general interest. The number of entries has been increased to upwards of five thousand.

The list of *Colleges and Universities*, which has proved to be one of the most often consulted of the special sections of the COLLEGIATE, has been completely revised and its basis of selection broadened to include a very much larger number of institutions. The pronunciation and syllabic division of the names of these institutions are given wherever needed.

The lists of *Abbreviations* and of *Given Names* have been revised and many entries have been added.

The section of *Arbitrary Signs and Symbols*, the *Vocabulary of Rhymes*, and the several sections treating *Orthography*, and *Punctuation, Compounds, Capitals, etc.*, and *Preparation of Copy for the Press* have been revised and retained.

**Editorial Staff.** The editing, checking, proofreading, and similar operations have been carried out by the trained editorial staff of G. & C. MERRIAM COMPANY, many of whom worked not only on the preparation of the previous edition of the COLLEGIATE but also on the NEW INTERNATIONAL, *Second Edition*. An exhaustive list of staff members who contributed to this NEW COLLEGIATE, some by performing essential clerical work and others by preparing or reviewing a few definitions, would serve little purpose; but it would be ungracious not to mention the chief participants in various phases of the work. The reviewing and writing of definitions were done by Dr. Lucius H. Holt, *Managing Editor*, Mr. Edward F. Oakes, *Associate Editor*, and the following *Assistant Editors*: Mr. Hubert P. Kelsey, Dr. Everett E. Thompson, Dr. Edward A. H. Fuchs, Dr. Philip B. Gove, Dr. Donald W. Lee, and Miss Anne M. Driscoll; pronunciations by Miss Elsie Mag and Mr. Edward Artin; synonyms by Miss Rose F. Egan; cross-referencing and checking by Miss Ervina E. Foss; proofreading by Mr. Hubert H. Roe and Miss Rita L. Goyette; the editing of various special sections as follows: *Abbreviations* by Miss Driscoll, *Biographies* by Dr. Gove, *Colleges and Universities* by Dr. Thompson, *Gazetteer* by Dr. Thompson, Dr. Lee, and Miss Foss, *Given Names* and *Rhymes* by Miss Egan, *Orthography, Punctuation, etc.* by Mr. Oakes.

The typesetting and electrotyping have been done by The Riverside Press, whose staff have once again given their hearty co-operation and have assisted with excellent proofreading.

WEBSTER'S NEW COLLEGIATE DICTIONARY represents the results of the collaborative efforts of the permanent MERRIAM-WEBSTER editorial staff, with the assistance of others previously mentioned. It is the product of an organization with the background of more than one hundred years of continuous dictionary-making experience. It is the latest addition to the MERRIAM-WEBSTER series of dictionaries which have served successive generations. We offer it to the user with the conviction that it will serve him well.

John P. Bethel  
General Editor.

# A GUIDE TO PRONUNCIATION

## KEY TO THE SYMBOLS USED IN THE RESPELLING FOR PRONUNCIATION

**REFERENCES.** Numbers following the respelling for pronunciation of some words in the Vocabulary refer to sections in this Guide.

**ACCENTS AND HYPHENS.** The principal accent is indicated by a heavy mark (´), and the secondary accent by a lighter mark (˘), at the end of the syllable. Syllabic

division is indicated by a centered period, except where this is replaced by an accent mark or by a hyphen used to join the members of words written or printed with a hyphen.

**FOREIGN SOUNDS** for which no special symbols are provided are represented by the nearest English equivalents.

| [ʊ]  | "  | pull  |     |    |   |
| [u]  | "  | pool  |     |    |   |
| [a]  | "  | sun (used only in stressed syllables)                                     |     |    |   |

[ə] in sofa (only in unstressed syllables)

Note: [ə] is not a symbol of the IPA, which at present has no unambiguous symbol for the sound.

### DIPHTHONGS

[aɪ] in ice      [aʊ] in house      [ɔɪ] in boy  
[ɹu] in mute: the symbols [ju] are used when the first element is [j] as in use, instead of [ɹ]

Note: [aɪ] and [aʊ], given above, are also diphthongs, the usual sounds of "long a" and "long o" (see §§ 5, 60).

### NON-ENGLISH CONSONANTS

[ç] = *ch* in German *loch* and Scottish *loch* "high" [hɪç], the voiceless palatal fricative (§ 60).

[x] = *ch* in German *ach* and Scottish *loch* [lox], the voiceless velar fricative (§ 60).

### NON-ENGLISH VOWELS

[y] in French *pur*, German *fühlen*, — the high-front-round vowel (§ 122).

[ø] " French *creuse*, German *Goethe*, — the mid-front-round vowel (§ 117).

[œ] " French *seul*, German *können*, — the low-front-round vowel (§ 117).

The symbols [l], [ɹ], [ɹ], [ɹ] represent l, m, n, and r sounds (hat form syllables either alone or with nonsyllabic sounds; as [hætʃ], [bætʃ], [kætʃ], [kætʃ], [fætʃ], [tætʃ], [bætʃ], [tætʃ]).

The colon [:] after a symbol indicates that its sound is long in duration as compared with that of the unmarked symbol. The raised period [ː] may be used for intermediate length.

The sign [+] after a vowel symbol (as [e+]) indicates a pronunciation of it with slightly raised tongue; [ː] (as [eː]), with slightly lowered tongue; [+ː] (as [e+ː]), with slightly advanced tongue; and [-ː] (as [e-ː]), with slightly retracted tongue.

## SYMBOLS USED TO INDICATE PRONUNCIATION WITHOUT RESPELLING

To indicate PRONUNCIATION WITHOUT RESPELLING, the table below may be used in connection with the one on p. vii. For indicating PRONUNCIATION BY RESPELLING, however, the table on p. vii is complete in itself and is alone used throughout this dictionary.

The table below is to be used only when any letter of a word has a sound that is represented in the table on p. vii by a different letter. Thus, in the respelling table *a* is used for one sound only, that in *sin* or *so*. To show the *a* sound of *a* (as in *his*) without respelling, the marked *a* (g) from the table below should be used, — thus, *hiŋ*. In the table below, the symbols in parentheses are the equivalent symbols from the respelling table.

In digraphs, mark only the letter that is to be regarded as sounded, as in *break*, *bread*, *yield*, *vell*, etc. Silent *e* at the end of a syllable, as in *face*, etc., need not be marked. *oe*, *ci*, *se*, *st*, or *ti* before a vowel, and immediately after an accented syllable, usually have the sound of *sh*, and need not be marked. Where desirable, any letter regarded as silent may be shown as an unmarked italic. In a few words, the pronunciation can be indicated only by respelling.

## I. PRONUNCIATION OF MODERN ENGLISH

## STANDARD PRONUNCIATION

**Standard Pronunciation.** The term *correct pronunciation* is often used. Yet it is probable that many who use the term would find it difficult to give a precise and clear definition of the sense in which they use it. When the essential facts are considered, "correctness of pronunciation" must be a flexible term. It is perhaps as accurate a definition as can be made to say that a pronunciation is correct when it is in actual use by a sufficient number of cultivated speakers. This is obviously elastic, depending both on knowledge — not always obtainable — of the number of users, and on judgment as to the cultivation of the speakers.

The standard of English pronunciation, so far as a standard may be said to exist, is the usage that now prevails among the educated and cultured people to whom the language is vernacular; but, since somewhat different pronunciations are used by the cultivated in different regions too large to be ignored, we must frankly admit the fact that, at present, uniformity of pronunciation is not to be found throughout the English-speaking world, though there is a very large percentage of practical uniformity.

The function of a pronouncing dictionary is to record as far as possible the pronunciations prevailing in the best present usage, rather than to attempt to dictate what that usage should be. In so far as a dictionary may be known and acknowledged as a faithful recorder and interpreter of such usage, so far and no farther may it be appealed to as an authority.

A further factor in the determination of correct pronunciation is the style of speech, within the same regional form, used for different occasions. The most important of these different styles is what may be called the cultivated colloquial, which has been aptly termed the style of well-bred ease. This is the most used of the standard styles, it is acceptable to every class of society, whether used by them or not, and its sound system represents the main current of progress, change, and unification of the language as a whole.

It is unfortunate that with some the term *colloquial* has somewhat fallen into disrepute, the impression having gained ground that a word marked "Colloquial" in a dictionary or similar work is thereby condemned as not in the best use. See the definition of *colloquial* in the Vocabulary.

In public worship, especially in reading from the Bible, the Prayer Book, or similar authoritative work, the rate of speech is often slower than in ordinary conversation or normal public utterance. The articulation of consonants is more distinct, and the vowels are often of greater length. The unaccented vowels are often sounded as if under secondary accent, as in *vulgate* (vŭl'gāt), *converse*, v. (kŏn-vŭrs'), *triumvirate* (tri-ŭm-vī-rāt), *labor* (lā'bŏr), etc. Such pronunciations with full vowel are confined to solemn or other very deliberate style.

## § 1. ACCENT

**Accent** may be defined as the prominence given to a syllable or a word which makes it stand out to the attention above adjacent syllables or words. Accent that distinguishes the syllables of words is called **word accent**, or **syllabic accent**. Accent that distinguishes words in a group is called **sentence accent**.

The term **stress**, which in a strict sense means force of expiration, is commonly used to mean accent, since it is the principal element of prominence. For clearness, **stress** will here be used as a general term for accent (prominence) both of syllables and words; **accent** will be used only of **word accent**, or **word stress**; while the prominence that distinguishes words in a sense group will here be called **sense stress** (other terms being *sentence stress*, *sentence accent*, and *emphasis*). Of the various degrees of accent, only the **primary** (ˈ) and the **secondary** (ˈ) need be marked.

## § 2. SHIFTING ACCENT

**Shifting Accent.** In many words and phrases, chiefly in adjectives and adverbs, the accent is often variable, being stronger on one syllable or the other according to the rhythm of the syllables in the context. Thus, we say, *The room is air'tight*ˈ, but *an air'tight*ˈ roomˈ.

In addition to the influence of sense stress and sentence rhythm, a number of other causes contribute to shifting and variable accent. One of the most potent of these is the emphasis of contrast. Such a word as *exterior* or *interior* by itself has the accent here marked; but when contrasted, these become *exterior* and *interior*. So *upstairs*ˈ,

*absolute*ˈly, in adverbs ending in -arily, as *arbitrar*ˈly, *neo'essar*ˈly, etc. Under emphasis these words are often pronounced *arbitrar*ˈly, *neo'essar*ˈly.

As a consequence of the various influences mentioned, in actual speech many words in English have no fixed accent.

In this dictionary, as a rule, one accentuation is given, together with

a reference (2) to this section. But the accentuation given in words of this sort may not be more "correct" than the one not given; the two merely represent different uses of the word; both equally correct. Usually, compound adjectives are entered in their predicate or absolute form, with even accent. This is taken as the basic form, as it is in most cases the original form, from which the attributive form (ˈ) is shifted. In some instances, however, the unevenly accented form is entered.

## § 3. BRITISH AND AMERICAN ACCENT

**British and American Accent.** A considerable group of words of French and Latin origin show a historical difference of accentuation in British and American usage. The most numerous of these are words ending in -ary (necessary), -ery (oermetory), -ory (dormitory). In Old French these words had primary accent on -ar-, -er-, -or-, and secondary accent on the second syllable before (neo'essar'le, etc.). In English the secondary accent became the main one, and the former primary became secondary (neo'essar'y), or the primary sometimes fell on the third syllable before the secondary (lab'oratory). But recently in southern England the secondary accent has been dropped, and the more usual British pronunciation is now neo'essar'i, lab'or'at'ory, etc. The older British pronunciation is, however, still frequently heard in England, and it is universal in America, except for the comparatively few instances in which there is recent influence from British practice. Those Americans who have adopted the newer pronunciation have usually done so in only a few of the large number of words of this class so pronounced in England. In England, on the other hand, it has affected all the words of the group. There the loss of the subordinate accent has naturally resulted in the reduction of the syllable that bore it, in some words suppressing it entirely. Hence in England are often heard the pronunciations mīl'it'ri, dīk'sh'n'ri, ōrd'n'ri, sōk'r'et'ri. In a few words the accent has been moved from the first to the second syllable in British usage, as in *labor'atory*, *axil'ary*, *oorol'ary*, thus preserving the unaccented syllables.

In a group of words ending in -ative (appreciative, cumulative, legislative, etc.) often paralleling verbs in -ate, British pronunciation is in a transition state, a subordinate accent, or at least a full vowel, being sometimes retained (admin'is-tra'tive), or the accent being lost and the vowel obscured, as in *cumulative* (kū'mū-l'd-tiv). In America such words as a rule have the full vowel and a subordinate accent; but when the main accent immediately precedes the syllable in which the *a* occurs, and in a few other words, the syllable is also reduced in American use (dēmōn'strātiv, dīr'm'at'iv).

In the small group of words ending in -mony, usage differs in England and America as in those in -ary; as, *testimony* (Brit. tēs'tīmōn'i, Amer. tēs'tīmō'n'i).

In a few other words British practice tends to one accent and an obscure vowel where America has two accents and a fuller vowel; as, *melancholy* (Brit. mēl'ānkŭl'i, Amer. mēl'ānkŭl'i), *neomanoy*.

In compound names in -borough (or -burgh), -bury (or -bory), British practice usually obscures or drops the vowel of the next to the last syllable, as in *Scarborough* (-bŭrŭ; -brŭ). Sometimes an alternating rhythmical secondary accent is heard with full vowel, as in *Canterbury* (kān'tŕbŭr'i; -br'i; or -bŕ'i). In compounds with -berry (strawberry) the pronunciation -bŕi; -br'i is there the rule, though sometimes -bŕ'i is heard. In the eastern United States sometimes the same obscuration is heard in *strawberry*, *blackberry*, etc., but in the country as a whole the full vowel is used (strŏ'bŕ'i).

## § 4. STRESSED AND UNSTRESSED MONOSYLLABLES

**Stressed and Unstressed Monosyllables.** Prepositions (at, for, from, to, etc.), auxiliary and copulative verbs (am, are, own, has, must, etc.), conjunctions (and, but, or, than, etc.), pronouns (he, her, me, your, etc.), and occasionally some other words, under the conditions of sense stress may receive any degree of stress from the lowest to the highest. Accordingly the vowels of these words vary from the full and "proper" sound suggested by the spelling to an obscure sound. Note the sounds of *to* in the natural utterance of the sentence, *It began to move to and fro*. In normal speech the unstressed *to* is here pronounced tŏ, while stressed *to* is tōb. Such words, though having only one spelling form as a rule, in actual speech have one stressed pronunciation and one or more unstressed pronunciations, — the difference, though really marked, often passing unnoticed because of the identity of spelling and similarity of meaning.

The stressed form is always used when the word is mentioned alone, not as part of a context; it is therefore necessary, in order to pronounce an unstressed form, to use it naturally, as if unconsciously, in a phrase, clause, or sentence; if pronounced by itself the stressed form will inevitably be spoken. Most of the words have more than one unstressed form, depending partly on the style of speech, partly on the preceding and following sounds, and partly on the rhythmic succession of syllables in the context.

# A Guide to Pronunciation

## II. THE SOUNDS OF SPOKEN ENGLISH

§ 5. *ā* as in *fāte*, *āle*, *mākk'er*, etc., is commonly called "long *a*." In standard English, *ā* is not usually a pure, or simple, sound, but is a diphthong, with several closely similar varieties, often beginning with the tongue a little higher than for *ō* (as in *mōt*) and moving toward *ī* (as in *īt*). The second element, or vanish, of the *ā* sound appears in accented syllables in both England and America when the sound is final or before voiced consonants, as in *dīny*, *āle*. But in America, before voiceless consonants it is usually not prominent and is sometimes lacking, as in *hāte*. In unaccented syllables, especially before vowels, the vanish may be absent in both England and America (*chū-ot'lo*).

The sound (*ā*) is also otherwise variously represented in the ordinary spelling, as in *pain*, *day*, *break*, *vell*, *obey*, and exceptionally in *gaol*, *gauche*.

§ 6. *ā* as in *cāre* is a relatively long vowel formerly identical with the *ā* sound, but gradually lowered by the influence of a following *r* to a more open front sound, reaching and passing below the position for *ē* in *vēry*.

The *ā* sound may be described as a front vowel lying in tongue position between the *ē* in *vēry* and the *ā* in *mān*. Two principal varieties exist in standard speech; one somewhat nearer acoustically and organically to *ē* than to *ā*, and the other decidedly nearer to *ā* than to *ē*. Both varieties are widespread in England and America alike, often occurring with different speakers in the same locality.

The typical occurrence of *ā* is in accented syllables formerly (17th century) containing a long *ā* sound, of various origin and spelling, before *r*, as in *aware*, *fare*, *there*, *bear*, *chair*, *prayer*, *vary*, *fairly*, *various*, etc.; and many longer words, as *precarious*, *barbarian*.

As stated above, the pronunciation of these words is not uniform in cultivated speech. In America *ā* may still be heard in *vāry*, *barbārian*, and in names like *Sārāh*, *Māry*. Some speakers used a lengthened *ē* sound in *Sārāh*, *Hungarian*, *vāry* (nearly like *vēry*), *Māry* (nearly like *mērry*), while in such words as *sāre*, *compare*, they would use the lower sound *ā*, as also in *wāry*, by analogy of *awāre*, *bewāre*.

When the vowel is followed by *r* and another vowel in longer words, the tendency (in America, at least) is toward the short *ē* sound in popular words, as in *Māryland* (*mēr'lənd*), *necessary* (*nēs'ēs-ērī*).

For those words (*barbarian*, etc.) that may be pronounced with either *ā* or *ā*, the marking *ā* is used in this dictionary as conforming to the more general tendency to lower the vowel. In Latin words, however, the older *ā* is retained in accord with the customary more formal and somewhat artificial pronunciation of Latin words and phrases and technical terms: *laros* (*lār'ez*).

Other spellings for *ā* are seen in *there*, *pear*, *air*, *heir*, *prayer*, *o'er*.

§ 7. *ā* as in *hāt*, *hāck*, *rān'dom*, *pār'tly*, etc., is commonly called "short *a*." Its spelling is almost invariably *a*, exceptionally *ai*, as in *plaid*.

The standard sound *ā* is low-front, the mouth being nearly or quite as wide open as for *ā* in *ārt*, but the tongue somewhat farther forward and the front (but not the tip) elevated instead of the back, as it is (though less) for *ā*. This is the sound often popularly called "flat *a*," with reference to certain supposed acoustic qualities, in contrast to "broad *a*," as in *father*.

§ 8. *ā* occurs in *ārm*, *fār*, *fū'ther*, *kh*, *ālms*, *pālm*, with equivalent spellings in *hearth*, *sā'gent*, and exceptionally in *memoir* (*mēm'wār*; -wēr).

This sound is classed by some phoneticians as mid-back (unrounded), i. e., made with the back of the tongue in a position midway between high and low, and with the lips not rounded. Others, however, class it as low-back. The Southern British *ā* is, however, pronounced with the tongue somewhat farther forward than for the usual American *ā*.

In Southern British and with some Americans the *ā* sound occurs also in such words as *chaff*, *path*, *grass*, *ask*, *chance*, *can't*, etc. For further treatment, see § 9.

In the larger part of America and Canada the *ā* sound is used in many words spelled with *o*, as *top*, *doll*, etc., and in words like *what*, *want*, etc., with *w* before *a* (see §§ 11, 73).

The stressed *ā* sound in all words except those spelled with *o* (*top*) is now a relatively long sound.

The symbol *ā* is also used to represent a shorter *ā* sound in unaccented syllables, as in *ārt-ist*, *chū-toon*; or partly accented syllables, as in *ārt-ist*, *chū-toon*.

§ 9. The symbol *ā* is used to represent a sound somewhat variable in quality, intermediate between *ā* in *mān* and *ā* in *ārt*, and medium or long in duration. It is used in the Vocabulary together with a reference to this section (§ 9) to identify a group of words that in this dictionary and other works indicating pronunciation have long been familiarly marked with the symbol *ā*. Of these words typical examples were mentioned in § 8, above, as *ask*, *chaff*, *path*, *grass*, *last*, *chance*, — words in which the vowel is followed in the same syllable by a voiceless fricative, *f*, *th*, *s* (but not *sh*), or by *m* or *n* + a consonant, and derivatives. For convenience these may be referred to as the "ask-words."

In standard speech three different pronunciations are current in these words. In southern England the long sound of *ā* is regular in them (*āsk*, *chāff*). This pronunciation is also used by large numbers of speakers in and near Boston, New York City, Richmond, Va., and by many individuals in the United States and Canada whose speech is influenced by that of these regions or by Southern British speech.

The sound of *ā* (*āsk*), usually somewhat lengthened, is used in these words by many educated speakers in England. In the United States and Canada this *ā* sound is used in the words by a large majority of speakers.

A third sound, the *ā* sound mentioned above, intermediate between

*ā* and *ā*, is used in these words by educated speakers of standard English in Scotland (called also Standard Scottish), though through Southern influence many are beginning to use *ā*, and by large numbers of educated persons in northern England. These two regions have no native *ā* sound, and also use the intermediate *ā* in all "short *a*" words (*hāt*, *mān*, etc.). So they resemble the greater part of America and Canada in using one vowel for both *ask*-words and *man*-words, though the vowel is *ā* in one country and *ā* in the other.

In America the intermediate vowel has long been approved in dictionaries and other works for the *ask*-words, and large numbers of people in New England and New York City regularly so pronounce them. As the *ā* sound and the *ā* sound are also in use in these places for the same words, reliable information is at present lacking as to how far the intermediate vowel prevails and the extent to which its use covers the words of the group.

In the small group of words *oalf*, *half*, *laugh*, *salve* (*n.*), *aunt*, *can't*, *shan't*, rather, the *ā* sound is more usual in Scottish standard English and Northern British English. In the United States and Canada, however, the situation is nearly the same as for the *ask*-words. In the country as a whole the *ā* sound strongly preponderates in all three groups of words.

In America the word *graph* and the suffix *-graph* are treated like *ask*, but derivatives like *graphic*, *telegraphic*, and the prefix *grapho-* regularly have *ā*.

Although the historical development of *ā* from *ā* took place chiefly before *f*, *s*, *th*, and *m* or *n* + a consonant, not all words that have these consonants after an *a* are pronounced with *ā* or *ā*. The only safe guide to the pronunciation of words like *ask*, *half*, *command*, etc., is actual cultivated usage.

§ 10. *a* as in *all*, *talk*, *swarm*, *quar'ter*, etc. — otherwise spelled as in *haul*, *caught*, *draw*, *awe*, and exceptionally in *U'tah*, *Ar'kansas* (-sō) — is equivalent to *ā* in *ōrb*, *bōrn* (see § 71), and the symbol *ā* is used in the respelling for pronunciation, however the sound may be ordinarily spelled; thus, *all* (*ā*), *talk* (*ā*), etc.

When a (*ā*) occurs in unaccented syllables it is briefer; as in *austere*, *al-though*, *au-thor'ity*. The symbol *ā* is used both for the short and the long sound. The short *ā* is the same in quality as accented *ā*, higher in tongue position than *ā* in *ōdd* and more lip-rounded.

§ 11. *a* as in *was*, *what*, *wan'der*, *wal'low*, *swan*, *qual'ity*, etc., is equivalent to *ā* (*ōdd*, *nōt*) (§ 73), and is represented in the respelling in this dictionary by *ā*; thus, *was* (*wāz*), etc.

*a* as in *any*, *Thames* = *ā*; see § 28.

§ 12. *ā* as in *chā-ot'lo*, *fā-tal'ity*, *vā-ca'tion*, *ā-sex'u-al*, and numerous adjectives or nouns in *-āte*, as *cor'dāte*, *du'pli-cāte*, represents a sound called "half long *a*," with reference to its *ā*-like quality, not to its quantity, or duration, which is short. This sound occurs in syllables without primary or secondary accent, with only enough accent (not usually marked) to preserve a recognizable *ā* quality of the vowel, as in *bi-tur'ōte*, *adj.*, *du'pli-cāte*, *adj.*, or *n.* In standard pronunciation the *a* in words like *duplicate*, *graduate*, *n.*, or *adj.* varies from a recognizable *ā* sound to *ā*. Hence the symbol *ā* in such cases may in practice represent a range of pronunciation from *ā* to *ā*. The symbol *ā* conveniently distinguishes adjectives and nouns like *duplicate*, *graduate*, etc., from the corresponding verbs, which have the full *ā* sound (*du'pli-cāte*, *grad'u-āte*, etc.). In some of the nouns or adjectives an *ī* is usual in familiar speech (*dēl'ē-gīt*, *dū'plī-kīt*; see § 13).

§ 13. In many words, *a* in a similar situation to the *a* in *cor'dāte*, as for example in *cottage*, is unaccented and is regularly pronounced as *ī*; so in *village* (*vīl'ij*), *savage* (*sāv'ij*), *homage* (*hōm'ij*). So *-ace* = *ī*, as in *palace*, *preface*, *furnace*; and *-ate* = *ī*, as in *climate*, *prélate*, *separate*, *adj.*, etc. In some such endings many speakers replace *ī* with *ā*, as in *immediate* (*ī-mē-dī-ā*).

*ai* and *ay* in final syllables are likewise often pronounced *ī* in some familiar words, as in *always* (*ālwāys*), and regularly in the days of the

*ā* or *ā* where British usually has *ī*, as in *delegate*.

Unaccented *ī* is sounded *ī* in *parliament* (also *ā*), *marriage*, and often, in colloquial speech, in *miniature*.

§ 14. *ā* in unaccented initial syllables, ending in a consonant in the spelling, as in *āb-hor'*, *āb-surd'*, *āc-count'*, *āc-true'*, etc., and in final closed syllables, as in *loy'āl*, *vā-cant*, *mad'am*, *māy'r-lād*, is more or less obscured in ordinary speech, becoming almost or quite the same as the *ā* in *so'fa*, *ī-de'a* (§ 15). There is considerable variation according to the style of speech used, whether very formal or familiarly colloquial. Hence as no single symbol can exactly express each variety of sound, the symbol *ā* is used to suggest a variable sound between the limits of *ā* in *so'fa* and *ā* in *āg'tate*, tending, however, in the majority of words, and especially in familiar speech, to the neutral vowel *ā*. The symbol *ā* is also used in some open syllables where it is desirable to suggest a tendency toward the *ā* sound, as in the first *a* of *phā-ryn'geal* (*fā-rīn'jē-ā*).

Between certain consonants, articulated in the same or nearly the same place in the mouth, this *ā* sound may disappear entirely, as in *mōrt'al*, *Sā'tan*, where in ordinary speech the final consonant usually follows immediately after the preceding one without any vowel whatever. Since in most cases, however, it is possible to pronounce the vowel, such words are often marked with both pronunciations (*mōrt'āl*, *-t'ī*; *Sā'tān*, *-t'īn*).

§ 15. *ā* as in *d-bound'*, *āc-rouse'*, *dī'a-dem*, *so'fa*, *ī-de'a*, etc., occurs in open unaccented syllables, including such as the first one of *ā-bridge*, in which two consonants begin the following syllable. In all styles of cultivated speech *ā* has the sound of the neutral vowel. See also § 36.

§ 16. The digraph *au* regularly spells the sound *ô* (lôrd, law), as in *ought, caught, haul, etc.* When followed by *n* (*haunt, launch, laundry*), it is pronounced *â* by many speakers, and this is given as an alternative pronunciation in this dictionary. The words *aunt* and *laugh* are never pronounced with *ô*, but with *ê*, *â*, or *â* (§ 9).

The digraph *aw*, pronounced as *ô* (ôrb), is now the usual form finally and before *k, l*, and *n*; as in *law, hawk, lawn*.

§ 17. *b* as in *boy, cab, ebb, rob'ber, s'ble, etc.*, is the voiced bilabial oral stop corresponding to *p*, the voiceless bilabial oral stop, and to *m*, the voiced bilabial nasal continuant. All three are lip sounds. *b* is usually silent after *m* in the same syllable, as in *bomb, climb, thumb, etc.* On the other hand, a sounded *b* is excessant in many words between *m* and *l* or *er*, as in *thimble, timber*. In *debt, doubt, subtle, b* is silent. Initial *b* before other consonants than *l* (*blue*), *r* (*brig*) is silent (*bedillum*).

In Spanish, *b* initially and after *m* or *n* is a lip stop, there being little or no explosive action after it. Medially, esp. between vowels, it is usually not a stop, but a bilabial fricative, a voiced sound made with the lips (but not the tongue back) shaped as for English *w*, and somewhat resembling English *v*, which is a labiodental sound. In fact, the two sounds and their spellings are sometimes interchanged; cf. *Havana, Habana; Cordova, Cordoba*. In this dictionary, Spanish *b* and *v* when initial or after *m* or *n* are indicated by *b* in the respelling, and medial *b* and *v* are transcribed as *v*.

§ 18. *c* spells three "soft" sounds and one "hard" sound: (1) The voiceless sound before *e, i, or y*, as in *cede, civil, cypress, force*; for this sound it is respelled with *s*, as *olt'y* (sft'y). It is sometimes written *q*, when not before *e, i, or y*, as in *façade*, regularly so for pronunciation without respelling (gft'y). (2) The voiceless *sh* sound, as in *vicious, ocean, oceanic*, in which the *c* is combined with the *t* or *e* (see § 103). (3) Rarely, the voiced *z* sound, as in one pronunciation of *sacrifice, suffice* (-fiz).

§ 19. *cis* "hard," i. e., = *k*, before any letter but *e, i, y, or h* (see *oh*) and when final, as in *can, cup, cry, aot, aro, pionic, plonloker*, exceptionally in *aeptic, solirious*. *oo* before *e, i* is pronounced *ks* (*success, vaccinate*); *oo* is pronounced *k* wherever *c* would be so sounded (*accord, accure*).

§ 20. *c* is silent in *czar* and its derivatives, and in *indict, victuals, musole, scene, etc.*

## oh

§ 21. This digraph has four sounds in English: (1) *oh* (2) *j*, (3) *sh*, (4) *k*. — (1) The most frequent (*oh*) is approximately *t + sh*. Though it is disputed whether *oh* is one or two sounds, in practice it functions as a single speech sound, as in *churoh*. It is the voiceless correlative of voiced *j*. In most native words *oh* has the sound *oh*, as in *ohild, ohin, much*. It is also (except initially) spelled *toh* (*satchel, oatch, watch, etc.*), chiefly after a short vowel, *tl* (*question*); *te* (*righteous*); and *t* before *u* (*nature*); see § 118.

(2) *oh* has been voiced to *j* in certain unaccented syllables. It is so regularly in the traditional pronunciation of *-wich* in English place names: *Greenwich* (grin'j), *Norwich* (nôr'j). In *knowledge, cabbage, partridge*, the spelling has conformed to the sound. In *spinach* it is pronounced *oh* or *j*.

§ 22. (3) In loan words from modern French, *oh* has the *sh* sound, as in *chagrin, machine, mustache, etc.* In some words borrowed early, as *chivalry*, association with modern French has introduced *sh* for the historically correct *oh*. In *champaign* (level country) British still keeps the pronunciation *châmpân*, while in America the Frenchified pronunciation is usual (*shâmpân*). — The *sh* sound of *oh* is indicated without respelling by *ch*.

§ 23. (4) *oh* has the "hard" sound of *k* in most words from Greek, either directly or through Latin, as in *chorus, echo, epoch*; and from Hebrew, as *Chaldea, Enoch*. But some that entered Anglo-Saxon, or came from Old French popular forms, have the *oh* sound, as *church, archbishop, archduke, chorub, chart, Rachel*; but *k* is the sound in *archangel, archtest, architrave*. — "Hard" *oh* (= *k*) is indicated without respelling by *ch*.

In Italian, *oh* before *e* and *i* represents *k*. In some words from foreign languages, the corresponding *oh* has a fricative sound. (See § 60.)

§ 24. *oh* is silent in *draohm, schism, yacht, fuchata* (common plant name).

§ 25. *d* as in *day, bed, hard, robbed* is the voiced tongue-point alveolar oral stop, corresponding to *t*, its voiceless correlative. Both are tongue-point sounds, the contact in English being on the upper teeth-ridge (alveoli).

The spelling *d* represents a *t* sound after a voiceless consonant in the same syllable, as in *dropped, talked, puffed, etc.* The past and past participle of *dream, learn, spell* are pronounced either *drêmt* (§ 89), *tûrnt, spêlt, or drêmd, lôrd, spêld*. Pronunciations with *d* are always spelled *-ed* but those with *t* are spelled either *-ed* or *-t*.

In archaic, poetic, or solemn style, the *-ed* sound is often retained, as in *belov'ed brethren, etc.*

*d* is regularly silent in *handkerchief, handsome, and, in informal speech, in grandfather, grandma, etc.* *Wednesday* is ordinarily pronounced *wênz'dl*.

*d* is palatalized before *i* and *u* in words like *soldier, verdure* (*sôl'yér, vûr'dûr*); see § 118.

*dg, dge*, see § 45.

§ 26. *ê* as in *êve, bê, mête, etc.*, is the high-front-tense vowel commonly known as "long *e*." This sound is formed with the tongue in nearly the same position as for *î* (§ 52), but slightly raised and more tense, with the highest part of the tongue farthest forward and nearest the front (or hard) palate of any of the English vowels. The sound *ê* occurs only in syllables of some stress, as in *keep'er, rûclothe'* (cf. § 35). It is also otherwise variously represented in the ordinary spelling, as in *feet, beam, deceiver, people, key, Cae'sar, ma-chine', field, quay, Phoe'be*.

§ 27. *ê* in *hêre, fêar, drêar'y, wêird, etc.*, is the high-front-lax (or lowered) vowel when followed by an *r* sound, and corresponds nearly to *î* when followed by an *r* sound. Just as the tongue position of long *î* is lowered to *â* in *ôare* by a following *r* (§ 6), so *ê* is lowered to *ê* in *hêre* by the *r*. As with the sounds *î* and *â*, dictionaries till recently made no distinction between *ê* and *ê*, though the difference between the vowels of *he* and *here* is now obvious.

The words *hero, Nero*, zero are pronounced either with *ê* or with *ê*. In the pronunciation of Latin words (technical terms, etc.), the older *ê* is often retained before *r*, while in the Anglicized adjective the *ê* is used.

In a few words, some speakers lower the *ê* as in words where *r* follows, as in *idea* and derivatives, *real* and derivatives, often pronounced *î-dê'd, rê'dl*.

The vowel *ê* is spelled as in *deer, dear, drear'y, mere, bier, weird, fa-kîr'* (fê-kîr').

§ 28. *ê* as in *ênd, pêt, êr'ror, etc.*, is the mid-front-lax vowel, slightly lower and laxer than *â* (âle), commonly called "short *e*" but varying considerably in actual length, as, e.g., between *pêt* and *ênd* or *well*. It is otherwise spelled in *helfer, leopard, friend, Aetna, asafœtida, feather, bury, any, Thames, said, says*.

§ 29. Unaccented short *ê* in initial syllables of such words as *ex-ouse', en-lar'ge', es-teem'* varies from a recognizable *ê* sound to an *î* sound. Obscuration toward the neutral vowel is also not infrequent among good speakers both in America and England, as *ê-ôkê't*. In medial syllables also, where a deliberate pronunciation often shows *ê*, as in *con'côn-trate, con'stê-lâ-tion*, obscuration takes place in ordinary speech, as *kôn'stê-lâ'shôn*.

§ 30. What was formerly a short *ê* also occurs in unaccented final syllables, as in *stream'let, kî'sex, kind'ness, small'est, oî'lege*; very often in the plural or the possessive case of nouns ending in a sibilant (*s, z, sh, etc.*), as *hors'es, match'es, Al'loe's, etc.*; in the third person singular of the present tense of verbs, as *push'es, urg'es, etc.*; in verbs and adjectives like *stat'ed, four-leg'ed, etc.*; and in *broth'ren, kitch'en, wom'en, wool'en* (for another sound of final *-en*, see § 37 ff.). These words vary in pronunciation of the *ê* from *ê* to *î*. In *stream'let, kî'sex* the *ê* sound is often heard in deliberate or formal speech, but *î* in more familiar speech, some speakers using *î* in both styles. In the endings seen in *kind'ness, small'est, hors'es, Al'loe's, urg'es, stat'ed*, and in *-en* of the words given above, the sound of *ê* in the familiar type of educated speech has long been *î*.

Some words, however, are pronounced with the neutral vowel in the best speech, as *olaret* (klâr'ê't), *diel* (dî'ê't); so with *-e-* in a medial syllable, as in *piety* (pî'ê'tî), etc.

§ 31. *e* in *fern, err, herd, verge, er'mine, in-fer'* is identical with *û* in *ûrn* (§ 117), by which it is represented in respelling in this dictionary.

When an originally short *ê* is followed by *r* and a vowel, it usually retains the short *ê* sound, as in *vêry, pêr'îl*.

§ 32. Cf. § 36. The sound *ê* in the unaccented syllables of *mak'er, v'er, rev'er-ent, per'form', in'fer-once, oav'ern* — otherwise spelled as in *l'ar, e-lîx'ir, aot'or, au'gur, sur-prise', pres'ure, glam'our, zeph'yr* — is the unaccented vowel corresponding to *ê* (§ 117).

In a large number of words the unaccented sound *êr* is variously spelled with *-ar, -er, -ir, -or, -our, -ur, -yr*. The final syllables of *bak'er, l'ar, sal'lor, au'gur, na'dir, etc.*, are sounded with the same vowel *êr*, which is established by long usage, unaffected by the various spellings.

§ 33. *e* in *sergeant* = *â*. *ê* before *r* final or followed by a consonant formerly often had the sound of *â* (ârm). A large number of words like *smart, dark, starve, darling, barn, Clark, etc.*, were formerly spelled with *er* and pronounced *êr* (as in *merry*). In most such words the spelling has also been changed from *er* to *ar* along with the sound change from *êr* to *âr*. But in some words the old spelling with *er* remains, as *Derby, Berkeley, Berkshire, clerk, etc.* In England the normal pronunciation (*dâr'bî, bûrk'îl, etc.*) is still used in these words, but a recent spelling pronunciation with *êr* is often substituted, esp. by those less familiar with them, — commonly so in America. *Heart, hearth, hearken* have a modified earlier spelling. In *Clark* the changed spelling has preserved the *â*, while in *clerk* (the same word) spelling has won the day for *âr* in America, and with some speakers in England. Several words have double spellings, and sometimes double pronunciations, as *clerk, Clark; person, parson; Kerr, Carr; sergeant, Sargent; etc.*

§ 34. *e* in *there, where*, spelled also as in *their, etc.* (§ 6), occurs only before *r*, and is identical with *â* in *ôare*, by which it is represented in the respelling in this dictionary. It is indicated without respelling by *ê* (thêre).

§ 35. Unaccented *ê* in *ê-vade', or'ê-ate', dê-lîn'ê-ate, etc.*, is shorter than *ê* in *êve*. This sound in formal or public speaking style is often a high but very brief *ê*, as in *k'thê'test*, but in colloquial speech, and often in formal speech, it regularly becomes indistinguishable in common words from *î*, as in *illu'sion*. In some familiar words the obscuration of *ê* goes even farther, to the neutral vowel *ê*, as in *society* (sô-sî'ê-tî), *necessary* (nê'sê-sê'rî).

§ 36. Unaccented *e* before *r*, as in *mak'er*, is of the same quality as accented *e* in *fern*, but shorter and laxer. Cf. §§ 31, 32.

When *ê* is sounded by itself, with no *r* sound, it is the same sound, with slight variations, as some other unaccented vowels; as, *a* in *sofa, e* in *fallen, i* in *terrible, etc.*

Words containing the sound *ɛr* can be marked without respelling thus: *lī'ɛr*, *elī'z'ɛr*, *so'f'ɛr*, *zeph'y'ɛr*, etc.

§ 27. *ɛ* as in *concentrate*, *angl'ɛ*, *moment*, *quiet*, *system* is obscured in varying degrees in ordinary speech. In the great majority of everyday words, unaccented *ɛ* before *n* or *l*, and in many words in other unaccented position, as in *quiet*, *propriety*, is obscured to the neutral vowel in colloquial speech. But as in some cases like *concentrate* the *e* may have the sound of *ɛ* without artificial effect, the symbol *italic ɛ* may indicate a sound varying from *ɛ* to the neutral vowel — the latter in the great majority of words. Most words in final *-en* have the obscure vowel, as *freshen*, *fallen*, except a few words in which it is frequently pronounced *ɛ*, as *woolen* (*wōl'n*) (§ 30), or is quite silent, as in *bitten* (*bīt'n*) (§ 38).

§ 38. Unaccented *e* before *n* or *l* often disappears entirely, leaving *n* or *l* to form a syllable alone or with another consonant; as in *eaten* (*ē't'n*), *garden* (*gā'd'n*), *model* (*mōd'l*), *vessel* (*vēs'l*). Such syllabic consonants are indicated in Webster symbols by an apostrophe before the consonant. When the apostrophe is used, there is no vowel whatever in the syllable. In some words, however, the syllable may be pronounced either with or without a vowel, as in *deafen*, *freshen*, *bushel*, *chapel*, which are accordingly marked *dēf'ēn*, *-n*; *chāp'el*, *-l*; etc. In many such cases the two pronunciations are possible where only one is given; and where both pronunciations are given for a main word, sometimes only one is given for its derivatives, though both are allowable.

§ 39. *e* as a consonant. When unaccented *e* is closely followed by another vowel having slightly more stress, there is formed a rising diphthong with a consonant *y* sound (or "consonantal" *y*) as its first element. A preceding *t*, *d*, *n*, or *s* sound is often palatalized (esp. in the common words) by the *y* element to *ch*, *j*, or *sh*, as in *righteous* (*rī'chūs*), *grandeur* (*grān'dūr*; colloq. *-jēr*), *ocean* (*ō'shān*). In some cases *e* remains a syllabic vowel, as in *Gideon* (*gī'dē-ān*); but often either pronunciation may occur, as in *hideous* (*hīd'ūs*; *hīd'yūs*), *piteous* (*pīt'ūs*; *pīt'yūs*), but after *v* (*aqueous*) or a consonant *+* *r* (*vitaeous*) the *y* sound is not heard (*hā'kwē-ūs*, *vīt'rē-ūs*), though it may occur after *r* alone, as in *calcareous* (*kāl-kār'ūs*; *kār'yūs*) (cf. § 58; see § 121).

§ 40. *e* silent. *e* is frequently silent at the end of a word. Final *e* is now written: (1) to show the vowel long, as *oīno*, *māte*, *hōpe* (cf. *oīn*, *mōt*, *hōp*); (2) to show a preceding *o* or *a* "soft," as in *lace*, *rage* (cf. *lao*, *rag*); (3) to show *l* or *r* syllabic after other consonants, as in *apple* (*āp'l*); (4) to follow certain consonants or groups that are not usually written at the end, as in *live*, *nurse*, *pulse*, *bronze*; (5) for various traditional reasons (as a former *long* vowel, etc.), as in *one*, *dome*, *fertile*, etc.

The *e* in *-ed* of the past and past participles of verbs is now silent except after *t* or *d* (*stated*, *needed*, § 30), though sometimes sounded in poetry or solemn style (§ 25). It is also silent in the ending *-ed* of verbs (*goes*) and of nouns (*stones*), except after sibilants (*tosses*, *horses*, etc.; see § 30).

§ 41. *ee* usually spells *ē* (*ēve*), as in *see*, *meet*, etc. Before *r* it is lowered to *ē* (*hēre*), as in *deer*, *cheer*, etc. (§ 27). In *been*, it has been shortened to *bīn*, the standard stressed and unstressed form in America. Many English speakers use stressed *bēn* and unstressed *bīn*; others use *bēn* or *bīn* for both. In some other words also *ee* has been shortened to *i*, as in *breeches*, *steelyards*, *sick*, *rick* (formerly *seek*, *reek*), though spelling pronunciation tends to restore *ē* in those still spelled *ee*.

## ei, ey

§ 42. *ei* spells *ē* (*ēve*), as in *conceive*, *leisure*; *ē* (*ēte*), as in *deign*, *rein*, etc.; before *r*, *ā* (*āre*), as in *heir*, *their*. When final, the spelling is usually *ey* as in *obey*, *they*, etc. Unaccented *ei*, *ey* are sounded *i*, as in *forget* (*fō'r'et*), *sovereign*, *money* (*mūn'ē*). Words containing this digraph when sounded *ē* or *ā* may be marked without respelling as in *deceive*, *rein*.

For *eu*, *ow*, see § 11.

§ 43. *f* as in *fame*, *fly*, *left*, *uff*, etc., is the voiceless lip-teeth fricative consonant, made by forcing the breath out between the lower lip and the upper teeth. Its voiced correlative is *v* (*vine*). It is also spelled in native English words with *gh*, as in *laugh*, *cough*. In Greek derivatives it is spelled *ph*, as in *phantom*, *photograph*, *telephone*, etc., and, by imitation, in *nephew*, for older *nevew*, *neffew*. In *of* the *f* is pronounced *v*.

## G

This letter spells three sounds:

§ 44. (1) "Hard" *g*, as in *gay*, *go*, *egg*, the voiced tongue-back velar stop corresponding to *k*, its voiceless correlative, and to *ng*, the voiced tongue-back velar nasal continuant. All three are tongue-back velar sounds, the back of the tongue, by contact with the soft palate, or velum, closing the air passage through the mouth. For *g* and *k* the nasal passage is also closed by the raised velum, while for *ng* it is open.

In modern English *g* is "hard": (a) Always when final: *beg*, *drug*; and in derivatives from such words: *begging*, *druglist*, where *g* is doubled to distinguish between, e.g., *ragged* (*rāg'ed*) and *raged* (*rāj'd*). (b) Before *a*, *e*, *u*, or a consonant in the same syllable: *game*, *go*, *gun*, *lingual*, *bag* (except in the British *gaol*, *gaoler*). (c) In words of Germanic origin before *e* and *i*: *get*, *give*, and in some words of doubtful origin, as *beggy*; and usually when doubled (*muggy*, *buggy*, *lugging*). (d) In a few Hebrew words, as *ge'rah*, *Gideon*. For *gz* and *gzh* spelled *x*, see under *X*.

"Hard" *g* is also spelled *gh* (*ghost*), *gu* (*guard*, *guest*), *-gue* (*plague*). It is indicated in respelling by plain *g*, as in *exist* (*ē-zīst*), and without respelling by *g* (*gun*).

§ 45. (2) "Soft" *g* = *j* (§ 50). *g* usually is soft in Latin or Romance derivatives before *e*, *i*, *y*: *gem*, *engine*. At the end of a word this

sound is usually spelled *-ge*, *-dge* (*rage*, *judge*); at the end of a syllable also by *dg* (*badg'er*, *judg'ing*). Like voiceless *tch*, *dg* occurs after short vowels (*edge*, etc.). "Soft" *g* does not begin native words. It is respelled with *j* in this dictionary, and may be represented without respelling by *g*, as in *gem*, *engine*.

§ 46. (3) *g* as in *French mirage* = *zh*. This sound occurs in a few recent French loan words not fully Anglicized; as *rouge* (*rō'sh*), *garage*, etc.

§ 47. *g* is now silent before final *m* or *n* (*diaphragm*, *sign*, *benign*); inflectional endings do not affect it: *diaphragming* (*-frām'ing*); but in such derivatives as *diaphragmatic*, *signal*, *benignity*, *g* is sounded (*-frāgmāt'ik*, *slg'nāl*). It is also silent initially before *n* (*gnat*, *gnaw*). For *g* in the digraph *ng*, see § 68.

## gh

§ 48. *gh* in *aghast*, *ghastly*, *ghost* is a useless spelling for "hard" *g* (*go*). In other English words *gh* has either become silent (*high*, *bought*, *caught*, *eight*, *bough*) or changed to *f* (*draught*, *laugh*, *cough*, *rough*). In *hough*, *gh* is sounded *k*. In Irish *lough*, etc., *gh* is like Scottish *oh*.

## H

§ 49. *h* in *hate*, *home*, *behave*, etc., is often called the aspirate, because it is made with a breathing sound. It is usually voiceless, but sometimes voiced when between vowels. The *h* sound occurs only at the beginning of syllables, and before vowels, or *w*, as in *where* (*hwār*), or *y*, as in *huge* (*hyūj*), never at the end of syllables or words.

In native English words at the beginning of accented syllables, even if only slightly accented, *h* is sounded in standard English whenever it is spelled (*har'dy*, *be-ho've*, *green'hous'e*).

Words that came from Old French into English had no *h* sound, though the *h* was often spelled, as *hospital*, *host*, *exhort*, *herb*, *humble*, *humor*, *hour*, etc. In the 18th century there was a gradual adoption of the *h* sound where it was spelled in such words. The most popular of the words, however, as *honest*, *honor*, *heir*, *hour* were in too frequent use to gain the *h*, and are still without it. Others still waver in general usage, as *herb*, *hostler*, *homage*, *humble*, *humor*, *hotel*. Those that lost the letter *h* are still without the sound, as *able* (OF. *(h)able*), *ostler*, *arbor* "bower."

The *h* sound has been dropped at the beginning of most unaccented syllables, as in *shepherd* (*shēp'erd*), *Durham* (*dūr'əm*), *forehead* (*fōr'ed*), *vehement* (*vē'mēnt*), *vehicle* (*vē'k'l*). In many such words spelling pronunciation has partly restored the *h* sound.

In the unstressed forms of *he* the *h* is regularly silent in ordinary speech, as in *They said (h)e would*; *They met (h)er*; *I saw (h)is father*, etc. At the beginning of longer words, as *historical*, *hereditary*, *h* is commonly pronounced. But usage and sentence rhythm vary, so that either *a* or *an* is written before such words: *a historical*, *an hereditary*, etc.

§ 50. *i* as in *ice*, *time*, *child*, *might'y* is commonly called "long *i*." It is also spelled as in *vio*, *ryo*, *height*, *eye*, *aisle*, *aye* "yes," *sky*, *buy*, *choir*. This diphthong *i* varies somewhat in both its elements. The last part is often nearer to *ē* than to *i*. The diphthong in standard American and British speech is virtually the same, with the first element like the *ā* of *aak* as sounded in New England and in many British local dialects. A form with the first element the *ē* in *fāther* is also common in both countries.

§ 51. "Long *i*" when not under the main accent, as in *i-de'a*, *bī-ol'ogy*, *dī-am'eter*, is still a diphthong, but somewhat briefer than when fully accented.

§ 52. Accented *i*, as in *bīt*, *ill*, *pī'ty*, *ad-mīt'*, is also spelled as in *sieve*, *English*, *pretty*, *been* (*bīn*), *breeches*, *threepence* (*thrīp'ēns*), *women* (*wīm'ēn*), *busy*, *bulld*, *nymph*, *hymnal*. This sound is commonly called "short *i*" and is the high-front-lax vowel corresponding to the high-front-tense *ē* (*ēve*) (§ 26). The same sound occurs before *r* and a vowel in words like *mīr'ror*, *līr'ic*.

§ 53. Unaccented *i* occurs in such words as *hab'it*, *oak'it*, *fam'lyne*, *in-tend'*, *trag'ic-al*, etc. When final, its spelling is changed to *-y* (*oap'y*, *hap'py*) or *-ey* (*mon'ey*, *hon'ey*). It is represented by various other spellings, as in *senate* (*sēn't*), *costage* (*kōst'ij*), *surfact* (*-fā*) (§ 13), *added* (*ād'ed*, *ād'ā*), *horses* (*hōr'sēz*, *hōr'sēz*), *smallest* (*smāl'st*, *smāl'tst*), *mountain* (*mōn'tēn*) (§ 30), *foreign* (*fōr'ēn*), *clephant* (*clē'fēt*), *mischief* (*mīsh'chēf*), *guinea* (*gīn'ē*), *coffee* (*kōf'ē*), *platoon* (*pī'fōn*, *pī'fōn*), *always* (*āl'wāz*, *āl'wāz*), *carriage* (*kār'ij*), etc.

The *i* of unaccented syllables is not always identical with *i* of accented (*bīt'ēr*). In America the tendency of final unaccented *i* or *y* immediately preceding another vowel is either to remain like accented *i* (*bīt*), or to vary to a higher tongue position toward *ē*. Phoneticians generally, however, use the symbol *i* (or an equivalent) for practical transcription of both accented and unaccented *i*.

§ 54. In longer words unaccented short *i* before an accented syllable (*as-pī-ra'tion*) or after it (*pos-si-bile*) very commonly is retracted further toward the neutral vowel (*ā* in *so'fā*). But there is great variation in good usage, and since many speakers sound *i* where others use a sound nearer to *ā* in *sofā*, and since the same speaker often uses either sound in different styles of speech, an italic "short *i*" (*i*) is used in this dictionary as an intentionally ambiguous symbol indicating that both pronunciations of words so marked are in general good use in England and America. Thus the symbol *i* is used to mark such words as *charity*, *vanity*, *possible* (and other words in *-ible*), *principle*, *polity*, *similar*, *animal*, *privilege*, *California*, *anonymous* (*-i-mōnē*), etc.; and occasionally in initial or final syllables, as in *divide*, *April*, etc.

In a difference so slight and so variable as this, it is difficult to represent usage exactly in every word concerned. The marking here is con-

For **la** in **carriage**, see § 13.

**N**

N. A small capital *N* is used in the respelling in this dictionary to indicate that a preceding vowel is pronounced as a nasal, as in French *bon* (bôn). The nasal passage from the throat must be open, but no *n* is pronounced. The tongue point makes no contact with the *w* teethridge, as it must do to sound *n*.

## ng

§ 68. The digraph *ng*, as in *sing*, *singing*, represents the voiced tongue-back velar nasal continuant, corresponding to the voiced tongue-back stop *g*, and the voiceless tongue-back stop *k*. The tongue back touches the velum (soft palate) for all three sounds. In sounding *ng* the contact of the tongue back with the velum prevents the voiced breath from issuing through the mouth, and, the velum being lowered, the sound passes out through the nose.

Though commonly represented by two letters *ng*, this sound is a simple nasal sound, neither *n* nor *g* nor a combination of them.

When followed by a *g* or a *k* sound, *ng* is also spelled with *n*, as in *anger* (āng'gēr), *ink* (īngk), *anxious* (āngk'shūs), *uncle* (ūngk'l), *another* (āngk'kōr), *conquer* (kōngk'kōr). It is represented by *ng* in respelling (fīng'gēr), and without respelling by *n* (fīng'gēr, īngk).

The letter *n* now invariably represents the *ng* sound when before a *k* or *g* sound in the same syllable. When *k* or *g* follows in the next syllable, usage varies somewhat. A few words suggest the rule that *ng* is sounded when its syllable is accented; as *con'gress* (kōng'grēs), *con'grega'tion* (kōng'grē-gā'shūn) beside *con'gres'sional* (kōng'grēsh'ūn-ā), *con'grat'ulate* (kōng'grāt'-), or *bron'chia* (brōngk'ī-ā) beside *bronchi'tis* (brōn-kī'tis); but the rule has many exceptions, as *con'crete* (kōn'krēt), *in'crease* (īn'krēs), or *bronchi'tis* (also brōngk'ī'tis). In many words usage varies, as in *conclude* (kōn'-; kōng'-), *con'cord*, *mel'anohol'y*, etc.

Between *ng* and certain other consonants, a *k* or *g* sound is present or absent with different speakers, regardless of the spelling. Thus, *k* is sounded by some in *anxious* (āngk'shūs), *length* (lēngkth), *strength* (strōngkth), *instinct* (īn'stīngkt), or *g* in *anxiety* (āngg-zī-ē-lī), and by others it is omitted (āng'shūs, lēngth, etc.).

## o

§ 69. *ō* as in *bid*, *nōte*, *ō'ver*, etc., is the so-called "long *o*" sound. It is also spelled as in *oh*, *roam*, *foe*, *shoul'der*, *grow*, *owe*, *sew*, *yeoman*, *beau*, *haut'boy*, *brooch*. When accented, *ō* is usually a diphthong in standard English. It begins with the mid-back-tense vowel, a "pure" *ō* sound, and glides to a vowel resembling *oo* (*ōōd*). In the speech of South England, however, the prevailing tendency is to begin the *ō* sound with the tongue farther forward toward the central position.

In America the diphthongal character is less marked. Before voiceless consonants, as in *note*, *oak*, the *ō* is often nearly or quite pure, without the *ōō* sound, or vanish. In any case, the beginning of the American sound, like that of northerly England, is a back vowel, not advanced, though sometimes slightly lowered toward *ō* (*ōrb*). The one symbol *ō* is here used to indicate all standard varieties.

§ 70. When long *ō* occurs before *r*, it has as its vanish the neutral vowel *ə*, representing the fore glide of the *r*, which is slight in America. Thus the word *more* has the diphthong (*ōē*) (*mōēr*). This applies to a large group of words that had a long *ō* (occasionally *ōō*) in Middle English, as *board*, *sword*, *court*, *pork*, *borne*, *coarse*, *course*, *before*, *door*, *oar*, *story*, and many others. These are to be distinguished from another large group now pronounced with *ō*, as *border*, *horse*, *lord*, etc., which had a short *ō* in Middle English. In the prevailing speech of South England these two classes of words have fallen together, both having the sound *ō*. This is a recent change. In all other parts of England there are cultivated speakers who keep such words apart in sound.

In the pronunciation of America as a whole the distinction between *hoarse* and *horse* is still made naturally. It is, however, disappearing in the speech of some in America who are influenced by Southern British practice. The *ō* sound in *hoarse* is not, however, identical with that in *hōpe*, but it is acoustically much nearer to that of *hōpe* than to that of *horse*. Some speakers also use a sound midway between *ō* and *ō* for both groups of words.

§ 71. The sound of *ō* as in *ōrb*, *lord*, *ō'rder* is also spelled with *a* in *all*, *talk*, *swarm*; by *au* in *fault*, *haul*, *caught*; by *aw* in *law*, *dawn*, *awful*; by *ou* in *fought*, *trough*; by *oa* in *broad*; by *ag* in *Magdalen* (mōd'lin); by *i* in *memoir* (mēm'wōr); and by *u* in one pronunciation of *sure* (shōr, § 84). This vowel is described as the low-back-tense rounded vowel, which may be long, as in *law*, or relatively short, as in *ausp'icious*. But its articulation is not uniform. In South England the typical sound is made with the back of the tongue in a low (but not the lowest) position and decidedly rounded lips (nearly or quite as closely as for *ō*), the British sound to an American ear often suggesting (but not reaching) a pure *ō*. The American sound is made with less lip rounding, often very slight — only a little compression at the corners — in which case a little higher position of the tongue and jaw helps to distinguish the *ō* sound from the low-back unrounded *ā* (*ārm*).

The sound *ō* is respelled in this dictionary with *ō* (*ōrb*); when spelled with *a*, *au*, *aw*, it may be indicated without respelling by *ā* (*āll*, *āult*, *āaw*).

§ 72. When *o* is followed by final *r* (*for*, *abhor*), or by *r* and a consonant (*horse*, *forty*), its normal sound is *ō* when it is not *ō* as in *fōrd* (§ 70), or is not obscured by lack of stress as in *actor* (āk'tēr). When the sound is followed by a vowel, as in *moral*, *sorry*, its regular sound is *ō* (mōr'āl, sōr'y) if it is not *ō* as in *glory* (glō'r'y). But derivatives from words like *abhor* (*abhorring*, etc.), although the *r* (*rr*) is followed by a vowel, usually keep the *ō* of the stem (*abhorring*, *abhorrer*). In America this commonly is extended also to less immediate derivatives, such as *abhorrent*, *abhorrence*. But in British use and sometimes in American, these are pronounced with *ō* (*abhorrent*, *abhorrence*).

§ 73. *ō* as in *nūt*, *ōdd*, *bōg*, *ōff*, *prōb'or*, *prōb'able*, spelled also with (*w*)*a* as in *want*, *wānder*, *wash*, *watoh*, is commonly called "short *o*." As now pronounced in South England, this is a low-back-lax rounded vowel, the tongue being in the position lowest and farthest back, and the lips having "open rounding," a degree of aperture only slightly less than the open unrounded position for *ā* in *fāther*. Since Southern British *ō* has a higher tongue position and

is much more closely lip-rounded, the sounds *ō* and *ō* are there quite distinctly different sounds, not the short and long of the same sound.

The *ō* sound is sometimes found in syllables with little stress, as in *car'bon*, *can'not*, *ma'ron*.

The rounded *ō* sound described above is not in general use in America. It is used by a considerable part of the inhabitants of eastern New England, by many in New York City, and to a considerable extent in the South. Words historically containing "short *o*" in general American pronunciation are mostly pronounced either with *ā* or with *ō*, not with the intermediate *ō*. Some of these variations are discussed in the following section. It is convenient to represent the "short *o*" by *ō*, which may thus indicate, for American pronunciation, either the true "short *o*" or the unrounded variety *ā*.

§ 74. *ō*. The following words containing a voiceless fricative (except *sh*), viz., *off*, *oft*, *often*, *croft*, *left*, *soft*, *soften*, *cough*, *trough*; (*a*) *cross*, *loss*, *toss*, *oost*, *frost*, *lost*; *broth*, *cloth*, *froth*, are prevailingly pronounced with *ō* in southern England, though *ō* is also heard. In *moss*, *moth*, *coffee*, *offer*, *office*, *officer*, *ō* is also heard there, but *ō* prevails; while only *ō*, as a rule, is pronounced in *doft*, *sooft*, *boss*, *dross*, *floss*, *gloss*, *Goth*, *proft*, *prophet*, *acost*, *Boston*, *gossip*, *gospel*, *hostile*, *possible*, and most other two-syllable words of the group. In Southern British also words with *au* (= *ō*) before *a* (*Austin*, *Austria*, *austere*) are often sounded with *ō* (*ōs'tīn*, etc.).

In the most general type of American pronunciation the *ō* sound prevails in all the one-syllable words above (except *doft* (rare) and *Goth* (cf. *Gōthlō*)), and also in the words *coffee*, *offer*, *office*, *officer*, *Boston*. But it must be remembered that American *ō* is not the closely rounded, *ō*-like vowel of British, being, in fact, not far from British *ō*. In the other two-syllable words the unrounded *ō* (= *ā*) prevails. But with those speakers in America who normally or frequently use a true *ō*, the latter sound is used in some or all of these words.

The variation in the sound of *o* in this class of words is indicated in this dictionary by the combined symbol *ō*, suggesting either *ō* or *ō*.

In another group of words having "short *o*" followed by an *r* sound (spelled *r* or *rr*), as *moral*, *sorry*, etc., usage in England is fairly uniform in the use of *ō*. In America the influence of the *r* (often slightly rounded) has made *ō* or *ō* in these words much commoner than the unrounded *ō* (*ā*), which is rare in these words. The more general sound in America in these is an *ō* of moderate length and more like *ō* than is British *ō*, — as in *sorry*, *moral*, *forest*, etc. The same tendency is seen in the *wa*-words, as *warrant*, *warrior*, *quarrel*, *quarry*, the most general American pronunciation being with *ō*, though *ō* is fairly frequent. When the *r* is final (*war*) or followed by a consonant (*warm*), the pronunciation is everywhere *ō* (*wōr*, *wōrm*), etc., just as in *abhor*, *horse*.

In a group of other words with *o*, as *bob*, *knob*, *rob*, *sob*; *God*, *red*; *bog*, *dog*, *fog*, *frog*, *hog*, *log*, *catalogue*; *doll*, American usage is quite variable. The most frequent pronunciations are with the unrounded *ō* (*hūg*, *nūb*, etc.), except in *dog*, *log*, *catalogue*, which more commonly have *ō*. In all these words, the true *ō* is, of course, proper, but most American speakers to whom the true *ō* is not native are likely to pronounce *ō* in attempting *ō*.

In words like *long*, *song*, *tongs*, *wrong*, and in *gone*, British speech has *ō*, but the more general American pronunciation is *lōng*, *gōne*, etc. In these words the unrounded *ō* is seldom heard.

§ 75. *o* in *ado*, *do*, *lose*, *move*, *prove*, *to*, *tomb*, *two*, *who* is an occasional spelling for the *ōō* sound (*fōōd*), which is represented in respelling in this dictionary by *ōō*, or may be indicated without respelling by *q* (*qōd*).

§ 76. *o* in *wolf*, *woman* (wōm'ān), *Worcester* (wōr'stēr), etc., is an occasional spelling for *ōō* (*fōōt*), respelled in this dictionary with *ōō*. It may be indicated without respelling by *q* (*wōlf*).

§ 77. *o* in *son* (sūn), *come*, *dove*, *front*, *honey*, *London*, *some*, *tongue*, *won*, etc., spells the *ū* sound (sūn). In some of the rarer words the *ō* or *ō* sound has been adopted from the spelling (§ 3), as in *ōmbat*, *constable* (kūn'atā'b'l; kōn'-), *wont* (wūnt; wōnt). The *ū* sound of *o* may be marked without respelling by *ō* (*ōn*).

§ 78. *o* in *work*, *worm*, *worm*, *attorney*, etc. (chiefly in native words after *w*), is equivalent to *ū* in *ūrn*. It may be indicated without respelling by *ō* (*wōrk*).

§ 79. *ō* as in the unaccented syllables of *ō-be'y'*, *pō-et'ic*, *e'gō-lism*, etc., represents a shorter variety of *ō* sound, without the vanish, or *ōō* sound, occurring in unaccented syllables. It is also used to represent a more obscure vowel sound, in ordinary colloquial speech becoming the neutral vowel *ā*, as in *anat'omy*, *biol'ogy*, *pōta'to*, etc.

§ 80. *ō* in *ōm'pact*, *ōm'form* represents an unaccented sound which ranges from a full *ō* sound (*stōp*) to the obscure neutral vowel in *nation* (nā'shūn). It occurs in a very large number of words which in ordinary speech regularly have the neutral vowel, as in *ōcour*, *ōnnect*, *reōllect*, etc., which are marked with *ō* to show that the *ō* sound has been obscured.

§ 81. *o* as in the unaccented syllables of *nation* (nā'shūn), *lern'on*, *hand'some*, *gal'lop*, *big'ot*, etc., always has the obscure sound, the neutral vowel. The symbol *ā* is used in this dictionary to respell *u* or *o* when the full *ū* or *ō* sound is not a normal pronunciation. Compare the two *o*'s in *obliv'ion* (ōb-līv'ī-ūn).

For *o* in *actor* = *ō*, see § 32, 36.

ol and oy

§ 82. *oi* in *oil*, *boil*, etc., is a diphthong consisting of *ō* + *y*, the elements being pronounced in a single wave of sound (*ō'y*). It is used in the respelling always with this value.

*oi* sometimes represents other sounds, as in *oham'ois*, *choir*.  
*oy* regularly has the sound of *oi* as in *oil*. The sound of *oi* when final is commonly represented, in the ordinary spelling, by *oy*, as in *boy* (*bōy*), and sometimes when medial, as in *royal* (*rōyāl*).

§ 83. *oo* in modern English represents most commonly the sounds *oo* in *food* and *oo* in *foot*, by which these sounds, however spelled, are represented in the spelling. The letters *oo* also spell the sounds of *u* in *good, blood*, and *u* in *door, floor, brood*.

*oo* as in *food, foot, noon, proof* — otherwise spelled as in *rude* (§ 114), *group, drew, fruit, do, canoe, rheum, maneuver, blue* — is the high-back-tense rounded vowel. Sometimes, esp. in South England, it is slightly diphthongal, beginning a trifle more open and ending closer.

§ 84. Before *r* (*moor, poor, tour, sure*) the *oo* sound is somewhat lowered by the *r* so as to become nearly or quite *o* (*moor, poor, tour, shoor*). Cf. the lowering effect of *r* in *here, care*. The same lowering effect is also seen in the last part of the diphthongal sound spelled with long *u* = *yoo* before *r*. Words like *endure, Europe, security* (§ 114) are commonly pronounced *en-dyoor' (-dooor')*, *yoor'up, se-kyoor'z*. In Southern British speech words like *poor, sure*, etc., are pronounced either *poor, shoor*, or *poo, shoo*.

§ 85. The sound *oo* as in *foot, book, oök, croök*, etc., also spelled as in full (*foot*), *wolf* (*wólf*), *would* (*wóld*), is the high-back-lax rounded vowel, with tongue slightly lower and less tense than for *oo* and lips less closely rounded.

The pronunciation with *oo* is well agreed on in the words *brook, broök, oök, croök, foot, good, hood, hook, look, noök, roök, shóok, stóok, tóok, wóld, wólf*.

In the following words, cultivated usage is divided between *oo* and *o*: *broom, coop, groom, hoof, hoop, pooh, roof, room, root, snook, soon, soot, spoon, whoop, whooping cough*.

## ou

§ 86. *ou* is the regular spelling for the diphthong in *out*. The *ou* sound in standard British and American is a diphthong beginning with *u* (*úok*) and ending with (or near) *o*, sometimes about *o*.

Other sounds represented by the letters *ou* in English are: *o* (*soul*), *oo* (*soup*), *oo* (*should*), *o* (*bought*), *u* (*double*), *o* (*hough*), *ü* (*journey*); and unaccented, *u* (*grievous*), *o* (*borough*), *o* (*glamorous*).

## ow

§ 87. When final, the diphthong *ow* is usually spelled *ow* (*cow, now*), sometimes also medially (*owwl, howl*). Likewise when *ou* is sounded *o* (*soul*) it is spelled *ow* finally (*know, tow*) and sometimes medially (*bowl*). Unaccented at the end of such words as *sparrow, fellow*, etc., the generally accepted pronunciation is *o* (*fóul's*, etc.). For *oy*, see § 82.

## p

§ 88. *p* as in *pay, play, happy, cup*, etc., is the voiceless lip stop, corresponding to the voiced lip stop *b* (§ 17), and the voiced nasal lip continuant *m* (§ 64). All three sounds are made with closed lips.

*p* is silent in *raspberry* (*ráz'bér'z*), *cupboard*, *recipit, corps*; and also in the commoner Greek derivatives *psalm* (*slím*), *psalter, pneumatic, pneumonia*, etc. In less common words, as *pseudo-, Psycho, pterodactyl*, etc., some pronounce the *p*.

§ 89. The *p* sound is often excrement, as in *Thompson, glimpse*, etc. The same excrement sound often occurs when it is not spelled, as in *warmth* (*wórmth*), *dreamt, comfort, triumph*, though usage varies in this, as it does also when the letter *p* is spelled, as in *em(p)ty, glim(p)se, jum(p)ed, sem(p)stress*, etc.

## ph

§ 90. *ph* as in *phantom*, etc., usually spells the *f* sound (*far*), chiefly in Greek derivatives, as *phantom, sylph, philosophy*, etc. Exceptionally, it has the sound *v*, as in *Stephen*, and in *nephew* as pronounced by some. In *diphthong, triphthong, diphtheria, naphtha*, etc., *ph* is often sounded *p*, but *f* is usual. Initially before *th* (*phthalin*) *ph* is more often silent: *thál'in; fthál'in*.

§ 91. *q* is regularly followed by *u*, with the sound of *kw* in native words, as *quell, quake*. In loan words *qu* is also usually *kw* (*quite, conquest*), but is sometimes *k*, as in *liquor* (*lík'ör*), *coquette* (*kó-két'*). Final *-que* is sounded *k*, as in *unique* (*ú-né'k'*).

§ 92. The letter *r* in *rate, very, far, feared, hurt, better*, etc., spells a variety of sounds, the chief of which are described here.

(1) *Description of r*. (1) The original English *r*, at least before vowels, was a tongue-point trill. The audible sound consists both of voice and the tongue-point vibrations.

(2) *Uvular r* (*velar r*, less properly, *guttural r*) is made by the combined sound of voice and rapid vibrations of the uvula against the back of the tongue raised toward the velum, or soft palate.

(3) *Fricative r* is made with the tongue raised to a position similar to that for the tongue-point trill, but with the point not vibrating. The point is close enough to the front palate to cause audible friction of the voiced breath between.

(4) *Frictionless continuant r* is formed by a tongue position much like that of fricative *r*, but with the tongue sufficiently withdrawn from the front palate to eliminate the fricative sound. Though similar in tongue position to fricative *r*, the difference is fundamental, no sound but voice being heard. It is vowel-like in sound.

(5) *Retroflex r* is a further modification of the fricative and frictionless *r*, in that the tongue point is further turned up toward the hard palate, in some cases being bent back, or "retroflexed." Here, too, there is no sound but voice. Organically, (4) and (5) are characterized by a gliding movement of the tongue to or from a vowel.

(6) If the tongue be held in the position for (4) or (5) and the voice sounded without change of tongue position, an "r-colored" vowel will result. This is the vowel *ü* (stressed) and *u* (unstressed) of general American pronunciation.

§ 93. (II) Occurrence of *r*. (1) *Trilled r* is still used by Scottish speakers of standard English, though not invariably in all positions of the word. It is also occasionally pronounced between vowels by Englishmen, usually with a single flip of the tongue. The trilled *r* is still common with Welsh speakers of English and in Irish and Scotch dialect. The point-trilled *r* is regular in German standard speech, and is common in some types of French. It is also regular in Welsh, Italian, and Spanish.

(2) *Uvular r* is found in English chiefly in Northumbrian dialect, but not at all in standard English. The uvular trill, or a strong fricative ("uvular scrape") articulated at the same point, is regular for Parisian standard French, and is also common in Germany.

(3) *Fricative* or (4) *Frictionless continuant r* is the usual one in standard Southern British. In so-called fricative *r*, the fricative element is often a minor one.

(5) Some degree of *retroflex r* is common with educated speakers in northern, western, and southwestern England, and is regular in the greater part of America and Canada. In regions where *r* is sounded finally and before consonants, retroflex *r* often affects the quality of a preceding vowel. In the most general type of educated American speech the *r* coincides with the vowel *ü* (*hürr*) and with the corresponding unstressed vowel *u* (*pürrövel*); i.e., the vowel is pronounced for its whole duration with the tongue in the raised position for *r* — the so-called retroflex, or "r-colored," vowel, no further consonant *r* being added. This is the only vowel in standard American English so affected.

*Loss of r*. In the standard speech of southern England, of eastern New England, of New York City, of most of the southern United States, and of some speakers in the cities of Canada (esp. eastern), *r* is sounded only before a vowel in the same or a closely following word, the letter *r* being retained in the spelling. The following will illustrate: *fear* (*fēā*), *are* (*ā*), *arm* (*ārm*), *form* (*fōārm, fōrm*), *bore* (*bōā*), *far away* (*fār āwā*), *here and there* (*hēr ān thār*), *here they are* (*hēr thār ā*). When an *r* sound is thus retained before a vowel of the next word, it is called *linking r*.

§ 94. As a result of sounding *r* only before a vowel, many words, spelled with final *r*, exist in two forms but in one spelling, as seen in *here I am* (*hēr ām*), *here they are* (*hēr thār ā*), according as a vowel follows or not. Hence any word that ends in *ā* (as *does* (*hēr*)), such as *idea* (*īdā*), etc., is likely to be treated like those that end in *r*, and hence to take an *r* sound when a vowel follows. Thus the speaker says, a *good idea* (*gōd īdār*), but the *idea of it* (*thē īdā*), etc. This is called *intrusive r*, and is common in England and eastern America, less so in the southern United States.

§ 95. Since speakers of some types of standard speech pronounce *r* where others do not, in this dictionary all *r*'s are marked in the respelling for pronunciation as being pronounced, with the understanding that those who omit *r* except before vowels will in these cases pronounce it or omit it just as they would when it appears in the ordinary spelling.

§ 96. The letter *s* spells four different sounds, two voiceless and two voiced; viz.: (1) *s* as in *sun* (*sūn*), (2) *z* as in *easy* (*ēz'*), (3) *sh* as in *sure* (*shūr*), and (4) *zh* as in *vision* (*vīzh'ūn*).

§ 97. (1) The usual method of forming English *s* as in *sun* is with the tip and blade of the tongue pressed close to the upper teethbridge, and the point drawn into itself so as to form a very narrow, tubelike channel between the tip and the teethbridge. A thread of voiceless breath forced through this channel strikes the points of the teeth (esp. the lower) and produces the characteristic "hissing" sound. It cannot be made with the mouth wide open, since the air stream does not then strike the lower teeth. Some speakers place the tip of the tongue behind the lower teeth, pressing the front of the tongue toward the teethbridge to form the channel.

Voiceless *s* is heard in *see, so, small, basis, yes, hats*, etc. It is otherwise spelled as in *pass, cell, rice, some, schism, tax, quartz*. It is silent in *aisle, tale, island, Carlisle, corps* (*kōr*), *chamois, rendezvous, debris, viscount, demesne, apropos, Grosvenor*, and with varying frequency in *bas-relief, Arkansas, Illinois, St. Louis, Louisville*.

§ 98. (2) Voiced *s* has the sound of *z* and is formed like voiceless *s* with the addition of voice. It is heard in *easy, resolve, has, is, ribs*. (Initial *s* does not spell *z*. This sound of *s* is respelled in this dictionary with *z*, as in *ribs* (*rībz*), and may be indicated without respelling by *s* (*rībhs*).

Two principal sources of voiced *s* (originally always voiceless) are: (a) Lack of stress, as in the unaccented syllables of words like *Mary's* (*mār'iz*), *roses*, etc., or in the frequently unstressed words *is, was, has*, etc. (b) Voice assimilation between voiced sounds, as in *observe, pansy, easy*; also in *refuse, lose*, etc., where final *e* was once sounded, and hence *s* was between vowels.

In certain nouns and adjectives spelled in the same way, the *s* sound was originally final, as it still is, as *abuse* (*ā*), *loose* (*ādj.*). Hence some pairs of verbs and nouns or adjectives are distinguished by the sound of *z* or *s*, however spelled, as *close*: *z* (*kīz*), *adj.* (*kīōz*) — *house*: *z* (*hōuz*), *n.* (*hōus*) — *use*: *z* (*ūz*), *n.* (*ūs*); etc.

§ 99. The ending *-or* or *-er* in the plural of nouns (*ships, bushes*), or in the possessive case (*Jack's, George's*), or in verbs (*eats, goes*), is pronounced according to the preceding sound. After voiceless sounds except sibilants (*s, sh, ch*) it is pronounced *s*; as in *ships, Bush's, takes*. After voiced sounds except sibilants (*z, zh, j*) it is pronounced *z*; as in *ribs, trees, Tom's, Joe's; diggs, goes*. After sibilants, voiced or voiceless, it is pronounced *z*, *iz* (§ 30); as in *loaves* (*lōvz/ēz*), *roses* (*rōz/ēz*), *Graces* (*grās'iz*), *thrush's* (*thrūsh'iz*), *ceases* (*sēs'ēz*), *gazes* (*gāz'ēz*).

§ 100. (3) *s* has the *sh* sound when it is palatalized by a following *i* or *y* sound (however spelled), as in *mansions* (*mān'shān*), *cessure* (*sēn'shēr*), *nauseous* (*nā'shūs*). See § 103.

§ 101. (4) Likewise voiced *s* (= *z*) has the sound *zh* when palatalized by a following *i* or *y* sound, as in *vision* (*vīzh'ūn*), *measure* (*mēsh'ēr*). See further in § 103.

## sh

§ 102. *sh* as in *sharp, rashly, bush*, etc., is pronounced with the tip and blade of the tongue approaching the hard palate a little farther back than for *s*. The aperture is wider laterally, so that the current of air passing over the tongue is more spread out like a waterfall than for *s*, in which it is like a jet. The main body of the tongue is also higher toward the roof of the mouth. The broader stream of air rushes against the teeth much as for *s*, the mouth requiring to be nearly closed. The position of the tongue is on the whole similar to that for *y*; hence *sh* and its voiced correlative *zh* are often called palatal sounds, and are, in fact, often the result of palatalization (§ 103).

The sound spelled *sh* is not a combination of *s* and *h*, contains no *s* or *h* sound, and is a simple sound. It does often result from pronouncing *s* next to a *y* sound, but when it becomes *sh* it ceases to be either *s* or *y* and becomes a different, simple sound. It is now also spelled as in *machine, chandelier, schist* (alif), *issue, mission, conscience, special, anxious*. See § 103.

When *s* and *h* are in separate syllables, each has its own sound, as in *shepherd* (shēp'p'herd'). In some names, ignorance has led to a wrong division and pronunciation that have come into good use, as in *Lewisiam* (= Lewis + ham), often pronounced lē'wīsh-ām for the historically correct lē'wīs-ām.

§ 103. The words *issue, mission, conscience*, etc., mentioned above (§ 102), contain instances of palatalization of *s* to *sh*. The condition for this is a consonant *y* sound following the *s*, and followed by an unstressed or lightly stressed vowel. In words like *conscience, special, nauseous*, etc., this *y* sound was earlier an unaccented *y* or *é* sound (still so spelled), which by lack of stress became a *y* sound, just as unaccented *i* in *Indian* (in'di-ān), may become *y* (in'di-ān), as explained in § 58. The sound *s* is thus, as the tongue anticipates the position for (palatal) *y*, transformed into the palatalized *sh* sound (cf. § 102, first ¶). Regardless of the spelling, when these combinations of sound occur, the palatalization takes place, as in *anxious* (x = ks), *nauseous*. So, too, before *ū*, as in *issue*, though the *y* sound is not spelled at all, it is yet a part of the pronunciation of *ū*, and the palatalization takes place as usual: *ish'ū*, *ish'ō*. The corresponding palatalization also takes place when the first sound is voiced *z* (x), which is changed to *zh*, the voiced correlative of *sh*; as in *vision* (vīzh'n), etc.

In some words, after the *y* or *é* has become *y* and been absorbed into the *sh* or *zh* sound (*mission, vision*), it has sometimes been restored, as seen in *Asia* (ā'zhā) but *Asiatic* (ā'zhī-āt'ik), etc. This is partly due to analogy, partly to spelling, and no doubt partly to the rhythm of utterance. Thus the rhythm of *ā'zhī-āt'ik* is a trifle difficult, owing to the adjacent accent, so that the more natural alternating rhythm is apt to be substituted (or kept from the beginning): *ā'zhī-āt'ik*.

§ 104. *t* as in *tie, note, apt, matter*, etc. — also spelled as in *Thomas, walked*, or without spelling in *eight* (ā'th) — is the voiceless tongue point alveolar stop, corresponding to the voiced tongue point alveolar stop *d*, and to the voiced tongue point alveolar nasal continuant *n*. All three are made with the tongue point on the upper teeth-ridge, as also is *l*. See § 25.

*t* in words like *question* is palatalized to *ch* as *d* in *soldier* is to *j*. See § 103, 118.

§ 105. *t* is silent in *Matthew, mortgage, hautboy, chaston, listen, castle, soften*, etc.; and commonly in combinations like *alt down, must go* — esp. when between two consonants.

§ 106. An excrement *t* is pronounced in *against* (formerly *against*), *amongst* (formerly *among*), *midst, pennant*.

## th

§ 107. *th* spells the tongue-point dental (or interdental) fricative, voiceless, as in *thin, ether, tooth*, or voiced, as in *this, either, smooth*, the symbol *th* being used in this dictionary for the voiceless, and *th* for the voiced sound. In forming *th*, the point of the tongue lightly touches the backs or the points of the upper teeth, in some cases protruding a trifle between upper and lower teeth, while breath hisses through with a fricative sound — the only sound when *th* is voiceless, and combined with voice when it is voiced (*this*).

When spelled with final *th*, the sound is usually voiceless (except in *bequeath, booth, mouth, v., smooth, with*); when final and voiced, it is usually spelled *-the* (*hath*).

The *th* sound is a simple sound, made with a single tongue position, not a combination of *t* and *h* sounds.

§ 108. Certain nouns ending in *th* have *th* in the singular (*mouth*) and *the* in the plural (*mouths*), etc. After a short vowel, there is a tendency to voiceless *th*, as in the plurals *breaths, deaths*, etc., and likewise after consonants, as in *breadths, months*, etc. But the usage is divided in some words, as in *truths* (trū'th; -ths), *youths*, etc.; and some words with long vowel regularly have voiceless *-ths*, as *heaths, growths*. In *cloths*, a modern formation, some speakers distinguish *oldths* 'pieces of cloth' from *oldths* 'kinds of cloth.'

Initial *th* in pronominal words (*the, this, then, there*, etc.) is now voiced (*this*, etc.). In the word with usage is divided, the voiceless form being especially apt to occur before voiceless consonants (with certainty, with feeling, etc.).

§ 109. The *th* is voiced in several verbs, as *bathe, loathe, teethe*, in which the final *-e* was once sounded. It is likewise voiced in the verbs *bequeath, mouth, smooth*, though the *-e* is no longer written. Thus the voiced *th* constitutes a distinction between nouns or adjectives and verbs; as *bath, bathe; mouth, mouth*.

§ 110. *th* has the sound of *t* in *thyme, Thomas, Esther*. When *t* and *h* are in separate syllables, each has its own sound, as in *nut'hatch*. Through ignorance, or reverence for the spelling, a *th* sound has become standard in some such words; as *Waltham* (wôl'thām; Brī. wôl'tām, -thām).

## ti

§ 111. *ti* in *nation, patience, martial*, etc., has the sound of *sh* (*shine*). In *bestial* (bēs'ohāl), etc., *ti* has an *oh* sound.

*ti* view, cue, suit, yule, yew, yew, and sound *i* used in syllables having a full stress (ōbē), or a subordinate accent, whether marked or not, as in *in'ter-view* (in'tēr-vū'ēr), *per-fume*. When quite unaccented, a different symbol (ū) is used (§ 118).

§ 113. The sound of *ū* varies both with different speakers and according to neighboring sounds. The main element of *ū* is the sound *ō* (ōōd), commonly with slightly forward tongue position. Preceding this is usually the sound of *y* (yē), or a more vowel-like sound *yū* (yū), the tongue being somewhat retracted. After certain sounds, the initial element is much lightened or absent, leaving only *ō*. (See § 114.)

§ 114. The *ū* sound, however spelled, varies in cultivated speech according to the phonetic nature of the preceding sound. The same condition, with some modifications, also affects the unaccented *ū* (§ 118).

(1) When the *ū* sound is initial, the *y* sound is always fully heard in all types of cultivated English, as in *use* (ūz), *union* (in'yūn), *ewe* (ū), *eulogy* (ū'lo-gy); the *y* is written in the phonetically identical sound in *yew* (yū), *yule* (yū), *youth* (yūth). *y* is also sounded whenever unaccented *ū* is initial, as in *utility*, etc.

(2) After *b* (*beauty*), *o* (*oobe*), *i* (*few*), *g* (*gew'gaw*), *h* (*human*), *k* (*Kew*), *n* (*mute*), *p* (*pure*), *v* (*view*), the sound *ū* is regular, and *ō* is not used. Thus there is no confusion between pairs like *beauty-beauty*, *cue-oo*; *few-foe*; *hew-who*; etc.

(3) After *s* (*assume*), *z* (*resume*), *th* (*enthusiasm*) — tongue-point fricatives — though the same pronunciations as in (2) are in accepted use, cultivated speakers in both England and America often suppress the first element of the *ū*, leaving *ō* alone: (*ā-sūm'*, etc.). This is often criticized, but is in widespread use.

(4) After *d* (*duty*), *t* (*tune*), *n* (*new*) — tongue-point stops and nasal — the *ū* sounds are also accepted generally, but here too in America, at least, the *ō* sound is widely used by the educated. It is to be observed, however, that the *ō* in these words is formed with the tongue farther forward, and that *suit, duty*, thus pronounced, are not accurately represented by the spellings "soot" and "dooty," and do not exactly rhyme with *shoot, booty*.

(5) After *l* (*lute*) usage is divided both in England and in America, the pronunciations *lūte* and *lōte* both being in good use. However, when another consonant precedes the *l* in the same syllable, as in *blue, blew, in-clude*, etc., the *ō* sound is regular. But if the consonant is in the preceding syllable, as in *al-lu'tion*, the pronunciation is like that of *lūte*. Thus in the word *flu'ent*, the marking is *flō-ō*, while in *stū'ent*, it is *stū-ō-ō*.

(6) After *oh* (*ohew*) and *j* (*June*) the first element of *ū* is likewise usually omitted (*ohō, jōn*). But after the palatalized sounds *ch* and *j* there is apt to be a noticeable glide to the following vowel, and the pronunciations often resemble (*chū, jū*).

Likewise after the simple sounds *sh* and *zh*, as in *sure, usu'rious*, the *y* element usually disappeared when *sh* or *zh* was palatalized from *s* or *z*. But *ū* is sometimes heard, as in *usu'rious* (ā-zhōr'ī-ū), *ō-zhōr'ī-ū*; and when unaccented, in *issue* (ish'ū, ish'ō).

(7) After the *y* element is now completely silent in standard speech, as in *rule* (rū), *brew* (brū), *crew, prune, true, threw*, etc. But the *ō* with tongue forward is still common in these words, though they are regularly marked with *ō* in the respelling in this dictionary (or without respelling, may be indicated by *y*, as in *ryple*). By this advanced *ō*, often also with prefixed retracted *i*, many Americans preserve the historical distinction in sound between *rude* and *rood*, *rheum-ism, threw-through, chews-choose, lute-loot*, etc.

(8) When *ū* occurs before *r*, the *ō* element of the *ū* sound is commonly lowered to *ō* just as is the simple *ō* sound, in such words as *Europe, fury, bureau, mural, cure, mature, endure*. Attention is often called to it in the Vocabulary by a reference to this section or to § 84. Thus a common pronunciation of the foregoing words is: *yōr'p, fyōr'ī, hyōr'ō*, etc. The lowered sound *ō* is especially evident after those consonants where the first (*y*-) element is sometimes omitted, as in *sure* (shōr), *rural* (rōr'āl), *fury* (fōr'ī).

Just as there is a tendency in Southern British speech to change *ō* before *r* into *ō* or *ā*, likewise the second element of *ū* (*yō*) in *pure, endure*, etc., varies to *ō* or *ā* (*pyōr, pyōr, pyōr; ēn-dyōr', ēn-dyār'*, etc.).

§ 115. *u* as in *pull, built, push*, etc., — otherwise spelled as in *wolf, wood, woman* — has the sound of *ō* in *foot* (§ 85), being respelled in this dictionary with *ō* (§ 70). It may be represented without respelling by *y* (*yull*) or *q* (*jolf*). This is the high-back-lax rounded vowel made with the back of the tongue raised toward the velum, and with lips rounded a little less than for *ō*. The same sound of *u* is heard in *sure* and in *sugar*.

§ 116. *ū* as in *sun, ūn'der, ūn-dō'* — otherwise spelled as in *son, in-some, does, flood, dōn'ble, two'pence* (tū'pēns) — is the "short *u*" sound. For the frequent spelling with *o* (*doe, wan, dōmo*), see § 77. As pronounced generally in America, this is a central unrounded vowel, the highest part of the tongue being a little lower and farther back than for the *ā* in *soil* or *ē* in *better*.

§ 117. *ū* as in *urn, hūrt, hūrl* is the vowel already mentioned in § 81, being the accented form corresponding to unaccented *ū* (§ 82). It is a central vowel, made with the tongue intermediate in position between front and back, although it varies somewhat with different speakers and when it occurs in different positions. The sound *ū* is otherwise spelled in *fern, err, heard, air, word, journal, myrrh*.

The sound *ū* occurs also in syllables with only a slight accent, often not marked, as in *bū-league*. There is often a choice between *ū* and *ē* according to speed of utterance or difference of usage (*bū-lesk', bē-*). Wherever *ū* is frequently heard in such lightly accented syllables, they are marked with the symbol *ū*, it being understood that, when entirely unaccented, the sound changes, without a sharp dividing line, to *ē*.

When *ū*, or its equivalent, is followed by *r* or *x* and a vowel, as in *hurry, courage, worry*, usage is divided as to the sound of the vowel. The earlier sound in such words corresponded to the present *ū*, and this is preserved as the usual pronunciation in America. But in the prevailing speech of England this sound has become *ō*, often somewhat modi-

fied by the following *r* so as to differ somewhat from *ti* in *sun, come*, etc. An intermediate type is also heard in America, acoustically between *ti* and *ti*, but *ti* is also common even with those speakers whose speech in some respects resembles British, esp. in the Southern States.

When words like *für, off, stir, err*, etc., take a vowel suffix, as in *furry, erring*, etc., they retain the *ü* of the stem. The word *erring* is also sometimes pronounced *err'ing* — esp. in *unerring* — both probably influenced by *error, errant*; but *err'ing* is more usual.

The symbol *ü* is also used in this dictionary to respell French words like *jeu*, having the mid-front rounded vowel, and *jeune*, having the low-front rounded vowel; or German words like *nachün*, with mid-front rounded vowel, or *künnen*, with low-front rounded vowel. The tongue for these sounds is somewhat farther forward than for English *ü*, which is usually not rounded.

§ 118. *ü* as in *finite, insular, nature, verdure*, etc., represents a modification of *ü* (§§ 112–114) in unaccented syllables. The sound *ü* differs from *ü* in taking as its second element either the lower *ö*, or a briefer form of *ö*, the same word often varying between a brief *ö* or *öü* according to conditions of speed, sense stress, or sentence rhythm. The treatment of the first element of *ü* is much like that of accented *ü*, according to the preceding consonants. When initial, the *y* sound is invariably heard, as in *finite, flourish, eugenio*, etc. After *s*, *y* is sometimes lost, as in *supreme*, often *sü-prem'*, etc. In familiar speech the vowel is often obscured to (*ü*) — (*sü-prem'*, etc.). After *ch* (*virtuous* (*vür'tü-ü*)), *j* (*judicious* (*jü-dish'ü*)), *sh* (*sexual* (*sök'shü-ü*)), *zh* (*visual* (*vizh'ü-ü*)), the *y* is often lost; but, as in accented syllables, there is some wavering. After *r* (*prudential* (*prü-dün'shü-ü*)), and a consonant + *i*, the *y* is regularly lost. In unaccented syllables, however, the preceding consonant often belongs phonetically to the syllable before the *ü*, as in *val'ü-ä'tion*, with the result that the *ü* is phonetically initial, and thus takes a clear *y* sound (as above): (*väl'ü-ä'tion*). Compare *re-pü'te* with *rep'ü-tä'tion*, *sa-lüte* with *sal'ü-tä'tion*. With these compare *af'luence* (*äf'ü-üns*), in which the first element of *ü* is much less like *y*. Likewise after *r* in a preceding syllable the *y* sound is often clear, as in one pronunciation of *erudite* (*er'ü-dit*), *garrulous* (*gär'ü-lüs*). So with partly accented *ü* in *Matthew* (*mät'h'ü*), with clear *y* sound.

For the difference between *fluent* (*flü-ent*) and *af'fuent*, see § 114 (5).

So far as the second element of the unaccented *ü* is not already lowered to *ö* by lack of stress, it undergoes the same lowering effect of a following *r* that is seen in accented *ü* (*endure*), or in simple *ö* (*pour*); as in *duration, duration*, etc. See §§ 84, 114 (8).

Before *u* in words like *measure* the *s* sound is palatalized to *sh*, and in words like *measure* the *z* sound is palatalized to *zh*, the *s* and *z* combining with the initial *y* element of the *u*. In the common words of this sort the *u* is reduced in ordinary speech to *ü* when before *r*, as in *censure* (*sän'shür*), *measure* (*möz'hür*). Other examples are *sensuous* (*sän'shü-ü*), *visual* (*vizh'ü-ü*), *ü-ü*. Initial *s* is not thus palatalized, however, as in *supreme* (*sü-prem'*; *sü-prem'*), *superior*, etc., and occasionally when medial, as in *consular* (*kön'sü-lür*; *kön'sü-lür*), the first element of *ü* being weakened or lost.

In words like *nature, verdure*, the off-glide of the *t* or *d* combines with the first element of *ü* to form a sound that varies from *ty* or *dy* to a completely palatalized *oh* or *j*. The last is the natural pronunciation in general use by unaffected speakers in all the common words. This palatalization is indicated in the pronunciation by the tie bar *ti*, *di*. This palatalization also takes place before the partly accented *ü*, as in *virtue* (*vür'tü*, *vür'chü-ö*), etc. But before fully accented *ü*, *di*, it does not occur in standard speech (*clime, duty*, etc.).

§ 119. *ü* in the unaccented syllables of *clothes, datum, submit, circumstance* — otherwise spelled as in *porpoise* (*pör'püs*), *plous, dungeon, righteous, gracious, atom, irksome, nation*, etc. — represents the obscuration of a *u* or an *o* sound to the stage of the neutral vowel, the usual italic tie indicating the obscuration.

§ 120. A silent *u* occurs after *g*, as in *guard, guess, rogue*, etc. In these cases *u* does not form a digraph with a following vowel, but is a mere sign of "hard" *g*.

In the common adjective ending *-ful* (*awful, careful*, etc.), the *u* is regularly silent in familiar speech, the *i* thus becoming syllabic (*ä'f'ül*, *kär'f'ül*). The noun ending *-ful*, as in *cupful*, etc., is pronounced with the vowel *ü*.

§ 121. *u* with consonant *value*. The letter *u* is an equivalent spelling for *w*, esp. after *q* (= *k*) or *g* (quality, quite, language, etc.); occasionally elsewhere, as in *persuade, suave, suffice*.

§ 122. *ü* as in French *menu* (*mö-nit'*), German *grün*, etc., occurs only in foreign loan words not yet naturalized. The French sound may be imitated by firmly rounding the lips as if to pronounce *ö* (*mö-nit'*), and then, while holding the lips in this position, pronouncing *ü* (*öve*). The German sound is in some words the same as the French, in others it is approximately *i* (*ü*) pronounced with somewhat less rounding of the lips.

§ 123. *v* as in *vain, vivid, ever, live, valve, wolves* — spelled *ph* in *Stephen* (also *Steven*), *nephew* (*näf'ü*; *näv'ü*), and *f* in *of* (*äv*) — is the voiced lip-teeth fricative consonant corresponding to voiceless *f* (§ 43).

*v* in Spanish is like Spanish *b* in pronunciation. See § 17.

## W

§ 124. *w* as in *we, worse, dwarf, twice* — spelled also *u* (*persuade, given*), *o* (*memorial* (*möm'wä*), *oholt* (*kwölt*)) — is a combined lip and tongue sound, the lips being rounded and the tongue back raised as for *ö* or *ö*. It may be regarded as a gliding sound, made while the lips and tongue are moving toward the position of the following vowel. It is classed as a *semivowel*.

§ 125. The consonant *w* sound occurs only before vowels. It is now silent before *r* (*write, wear*, etc.). The letter is often written finally, as in *snow, know*, and *now*. In *snow* it is not needed, for *ö* alone spells the same sound, as in *go*. In *now*, however, *w* is essential, representing the second element of the diphthong *ou* in *out*. Omission of *w*

would change *now* to *nö*. The group *aw(o)* is the final form for the spelling *au*.

§ 126. Besides being silent before *r* (*write*), *w* is also silent before vowels in two classes of instances: (1) When not initial, *w* coalesced with its closely related *ö* or *ö* sound, as in *two* (*tö*), formerly *twoö*, *who* (*hö*), formerly *hwö*, *award* (*äörd*), formerly *awöörd*. Initially *w* remains before *ö*, as in *wound* (*wöund*; *wöund*), *weo*, *womb*, etc. (2) Before the vowels of unaccented syllables or unstressed words *w* regularly disappeared, as in *answer* (*än'sär*), *toward* (*törd*), *boatswain* (*bö's'n*), *I'll go* (from *I' will go*), and the endings *-wich* and *-wick* of place names — *Woolwich* (*wööl'ü*), *Warwick* (*wör'ik*). Many such silent *w*'s have been restored by spelling pronunciation. In one, *oreo*, *w* is sounded but not spelled.

## wh

§ 127. *wh* as in *which, when, whale*, etc., represents either *h* + *w* or a voiceless *w* sound. Voiceless *w* and *hw* sound very much alike. The symbol *hw* is commonly used for either sound.

For *hw* is now usual in standard Southern British speech. In Scotland, in Ireland, in North England, and in America, *hw* is the usual pronunciation, though the *w* sound appears to be spreading in America.

§ 128. *ex* as in *exit, exult*, *luxurious* (*lüks-zhü-ü-üs*), *anxiety* (*äng-zü-ä*) and initially in Greek derivatives, as *xylophone* (*xü-lö-ön*), etc.; (6) *sh*, as in one pronunciation of *anxious* (*äng'shüs*). In *except* (*äk-sépt*), *exceed* (*äk-séd*), the *s* element of *sh* is merged with the *s* sound of the *o*, or *so*. In (3), (4), and (6) the *s* or *z* element of *sh* has been palatalized by the following *i*, or by the *y* element of *ü* or *ü* (§ 118).

It will be seen in the above examples that when *x* immediately follows an accented vowel (*exit, luxurious*), or is followed by a consonant sound (*exclaim*), it is voiceless (*ks, kh, sh*); when it immediately follows an unaccented vowel (*exact, exhort, luxurious, anxiety*), it is voiced (*gz, zh, z*).

But the analogy of differently accented forms of related words disturbs this natural phonetic tendency; thus *luxurious* is also pronounced *lüks-shü-ü-üs*, by analogy of *luxury*; and conversely, *luxury* is sometimes *lüks-shü-ü-üs*. Moreover, less familiar words are likely to have *ks* from the spelling, or from a foreign pronunciation,

§ 129. *y* in English spells one consonant (*yes*) and the following four vowels: (1) *i* (*sky, defy, style*, etc.); (2) *ä* (*lyric, nymph, pity, ready* (§ 130), etc.); (3) *i* (*myrrin, myrtle*, etc.); (4) *ä* (*martyr, zephyr*, etc.). *y* (or *ey*) is the regular spelling for the final sounds *i* (*fly*) and *i* (*ready, money*). These sounds of *y* may be indicated without respelling as in *sky, nymph, myrrin, martyr*.

§ 130. Unaccented final *y* as in *ready*, or *ey* as in *money*, varies considerably from accented *i*. For this variation and for that of medial *y* (*analysis*), the equivalent of medial unaccented *i* (*charity*), see §§ 53, 54.

§ 131. As a consonant, *y* is the typical palatal semivowel, formed with the front of the tongue, behind the tip (which is lowered), near or touching the hard palate. It corresponds to the sound of *j* in German and Latin. English *y* differs from that of German and some other European languages in having no fricative or other sound but voice. It is analogous to *w* in being a gliding sound (§ 124). It is spelled *y* in *year, you, beyond*, etc.; *i* in *poniard, union*, etc.; *ö* in *feud* (*füd*), *linear* (*lün-ä-är*; *lün'yär*); *j* in *hallelujah*; *g* in *vignette*. It is sounded without being spelled by a separate letter in *use, unite, value*, etc.

Like *w*, consonant *y* can occur only before vowels, not at the end of words. When written at the end of words, it is: (1) a vowel (*ready*); (2) a diphthong (*sky*); (3) the "vanish" of the partial diphthong *ä* (*day, they*); or (4) the second element of a full diphthong (*boy*). Unlike *w*, *y* by itself can spell a vowel (*ready*) or a diphthong (*sky*).

## Z

§ 132. *z* as in *zeal, hazy, buzz*, etc., is the voiced tongue-point alveolar fricative continuant corresponding to voiceless *s* (§ 97). *z* is often spelled with *s*, as in *busy, his, ears, robs, roses*, etc. It is rarely spelled *so* (one pronunciation of *discern*) or *o* (one pronunciation of *suffice, sacrifice*).

§ 133. *z* as in *azure, seizure, grazer*, etc., has the sound of *zh*, the voiced correlative of *sh*. The same sound is spelled *s* in *vision, measure*, etc. In the foregoing, the *zh* sound results from the palatalization of *z* before *i* or *y* (§ 103). *zh* is also spelled in French derivatives by *g* (*rouge*) and by *j* (*bijou*). It forms the second element of the consonantal diphthong *j* (nearly *d* + *zh*).

## RULES FOR THE PRONUNCIATION OF LATIN ENTRIES

Vowels not followed by a consonant in the same syllable are to be pronounced long (*i, e, i, ö, ü*), and vowels followed by a consonant in the same syllable are to be pronounced short (*ä, e, i, ö, ü*), unless the respelling for pronunciation indicates otherwise. Consonants have the same value as in similar situations in English unless the respelling indicates otherwise. For those who prefer to pronounce the Latin entries according to the "Roman" method, the syllabification as indicated, together with the rules for such pronunciation as set forth in the Latin grammars, will be a sufficient guide.

# EXPLANATORY NOTES

A careful reading of the following Explanatory Notes will enable the user of this dictionary to locate quickly and easily the answers to his questions and will make plain the significance of the different kinds of type, the labels, the symbols, and the other conventions that make possible its compactness and fullness.

The regular order of arrangement of the parts of the entries in this dictionary is as follows (although, of course, not every entry has all of these parts): 1. The vocabulary entry. 2. The pronunciation, in parentheses. 3. The part of

speech. 4. Inflectional forms. 5. The etymology, in square brackets. 6. The definition or definitions. 7. Synonyms and Antonyms. 8. Run-on entries.

In the following paragraphs, numbered to correspond with the numbers in the above list, each of these parts of the entry is discussed in detail with illustrations, usually in the form of references to entries in the *Vocabulary*. The sections numbered 9 and 10 deal with special types of composite entries calling for special interpretation; section 11 deals with pictorial illustrations.

1. **The Vocabulary Entry** (the term to be defined) is printed in heavy-faced type. The spelling, accent, syllabic division, hyphenation, variant forms, and capitalization are shown in the entry.

If the entry is a word of more than one syllable, the syllables are indicated by a centered period [·], or by a heavy accent ['] or a light accent [ˈ]. Each of these indicates the end of a syllable — the point where a word should be divided at the end of a line in writing and printing. The accents also show on what syllables the stress falls in pronouncing a word. In hyphenated words, the hyphen marks a syllabic division of the word.

When more than one spelling or form is given, the one printed first is in general to be preferred. If the forms are of equal or nearly equal standing, they are separated by a comma (canyon, cañon; sextet, sextette; inward, inwards) or by the word *or* (see 1st plane; sandbox tree; heath grass; real estate). If one form is distinctly preferable, the second form is usually preceded by the word "Also" (see envelope, n.) or its status is otherwise plainly indicated (see moonlit, candelabrum). Spellings proper in British use are regularly set off by a comma from the American spellings in vocabulary entries (analyze, analyse; peddler, pedlar). See *British Spelling Preferences*, page 1197.

**Proper Names and Proper Adjectives** either are entered with a capital letter or are treated otherwise to show the capitalization (see illuminati). Nouns which are proper nouns in one or more senses, but common nouns in other senses, have the facts shown by bracketed notes (see dharma).

**Prefixes** (such as pre-, sub-, un-), **Suffixes** (such as -ation, -hood, -ness), and **Combining Forms** (such as paleo-, -plasty) are entered and defined. See also § 9, below.

**Foreign Words** are indicated by prefixed parallel bars (see ||Autobahn, ||flâneur). These are terms that occur frequently in speech and in print in English, but are not generally considered to be Anglicized. While parallel bars are affixed to these words indicating them to be commonly italicized in printing and writing, italic type for these words in this dictionary is precluded by use of italics for several other purposes.

2. **The Pronunciation** is given, in parentheses, following the vocabulary entry. In the pronunciation, (xviii)

the word is respelled in the WEBSTER phonetic alphabet. (A working key to this alphabet is printed inside the covers at the front and back of this book; and a full key on page vii.) In the pronunciation respelling, a heavy accent mark ['] is placed after the syllable on which the chief stress falls in pronouncing the word; a light accent mark [ˈ] is placed after a syllable on which there is a lighter, or secondary, stress; and a centered period [·] is placed after the syllables on which there is no stress.

In the pronunciation respelling the syllabic division sometimes differs from that of the heavy-faced entry because in the heavy-faced entry the division is according to printers' usage; in the pronunciation respelling, the division is according to speech; thus:

dou'ble (düb'əl), mi-li'tia (mī-līsh'ä),

spe'cial (spēsh'äl), vi'sion (vīzh'ün).

Figures within the parentheses with the pronunciation refer to sections of the *Guide to Pronunciation* in the Introduction, where additional information is given regarding the pronunciation of the word or the group of words to which it belongs.

A part or the whole of a pronunciation is often omitted when it is the same as that of a word immediately preceding and may be readily supplied from such preceding entry.

Accents and syllabic division only are given for some phrases and compounds, and for some derivatives ending in common suffixes such as -ess, -ing, -ist, -less, -ment, -ship, if the pronunciation is perfectly regular and can therefore easily be learned from the separate parts.

When two or more pronunciations are recorded the general rule has been to place first the one that has been selected as preferable. Each form entered, however, has the support of good usage, and in some cases this usage is nearly or quite equally divided. Specific variations of usage have been indicated by limiting words, as *often*, *sometimes*, etc.

Further explanations will be found on page vii and following.

3. The name of the **Part of Speech** follows the pronunciation or (if no pronunciation is given) the entry word. The part of speech is given as an italic abbreviation: *n.* for noun, *v.* for verb, *adj.* for adjective, *pron.* for pronoun, etc. (see list of abbreviations, page xxi). When the entry consists of two or more separate words it is not labeled except, for clarity, in a few instances,

chiefly the proper nouns and adjectives run on after entries in the *Gazetteer* (as at *Newa Scotia*, page 1127).

Occasionally the same entry is labeled as belonging to two or more parts of speech; thus:

*ago*, *adj.* & *adv.*

*asthma*, *n.* . . . — *asthmatic*, *adj.* & *n.*

If a verb is both transitive and intransitive and has more than one meaning, the *transitive* and *intransitive* meanings are usually separated and labeled *v. t.* and *v. i.* respectively, the second label being preceded by a heavy dash (see *break*, *conduct*). If the transitive and intransitive definitions of a verb can be combined without ambiguity or confusion, the label is *v. t. & i.*, for *verb transitive and intransitive* (see *concentrate*, *recite*).

**4. Inflectional Forms** (as the plural of a noun, the past tense and the participles of a verb, and the comparative and superlative forms of an adjective or adverb [see *COMPARISON*, 2, in *Vocab.*]) are given, in SMALL CAPITALS (see *mouse*, *shake*, *v.*), when they are irregular or present difficulties of spelling or pronunciation.

The plural of nouns is indicated by the prefixed italic abbreviation *pl.* Plurals formed regularly, by the addition of *s* or *es* (see *Orthography*, § 12), are not ordinarily given. Plurals of compounds (such as compounds of *man* and *berry*) are often omitted when they are formed in the same way as the plurals of the main word. If a noun has the same form in both singular and plural, the label is *n. sing. & pl.* (see *deer*). When two (or more) plurals are given, the first is in general to be preferred. When different plurals are used for different senses of a word the usage is plainly indicated (see *antenna*, *genius*). See also the note at the entry of *plural* in the *Vocabulary*.

When a verb is entered without principal parts, such omission means that the past tense and past participle are formed by adding *-ed* (see *climb*) or, if the verb ends in a mute *c*, by dropping the *c* and adding *-ed* (see *unite*). Principal parts formed otherwise are shown in SMALL CAPITALS. The principal parts of verbs are separated by semicolons. When three forms are given (see *blow*) the first is the past tense; the second, the past participle; the third, the present participle. When only two forms are given (see *abuse*) the first is both past tense and past participle. If alternative forms are given for any of the principal parts, these are set off from one another by commas (see *bereave*) or by words like *or* and *also* (see *level*). In complex situations, italic labels (*past*; *past part.*; and *pres. part.*) are added for complete clarity (see *cleave*). In the case of compound verbs formed from a verb whose principal parts are shown, a cross reference to the latter is often given instead of repeating the principal parts (see *befall*). For obvious compounds beginning with *re-*, no principal parts are given; readers should consult the main verb.

**5. The Etymology**, in square brackets, precedes the definition. For the meanings of abbreviations in the etymology, see list of abbreviations, page xxi. The following familiar conventions are used:

In the etymology the words in italic type are those, whether English or foreign, from which the vocabulary word is derived; definitions of the italicized words are printed in roman type:

*cipher*, *n.* [OF. *cifre* zero . . .]

When the only etymology is [F.], [L.], or the like, or when the etymology begins with F., OF., etc., followed by a comma, the source word in French or Latin is spelled in the same way as the English word:

*front*, *n.* [OF., forehead, . . .]

Occasionally, only the language source is given, the

label being then preceded by "from" or "through." Intermediate steps in an etymology are sometimes omitted, being indicated by the words "deriv. of" (derivative of) or "ult. fr." (ultimately from):

*almond*, *n.* [From OF., ult. fr. L. *amygdala*, . . .]

Any prefix, suffix, or combining form without definition will be found defined in its alphabetical place:

*geology*, *n.* [*geo-* + *-logy*.]

In the case of many words descended originally from Latin or Greek, the etymology gives also the primary Latin or Greek constituents of the word:

*coleopterous*, *adj.* [Gr. *koleopteros*, fr. *koleos* sheath + *pteron* wing.]

In words of Chinese origin, the small superior figures refer to the four tones of the Peking dialect, which is the accepted standard of speech:

*ginseng*, *n.* [Chin. (Pek.) *jen<sup>1</sup>-shen<sup>1</sup>*.]

These tones are pitched in different keys to facilitate the recognition of many words that have the same sound.

The history of a word is in general traced back as far as it can be with certainty. Thus if a Middle English word is the only etymology given, the source of the Middle English word is either unknown or doubtful:

*wiggle*, *v. i.* [ME. *wigelen* to totter, reel.]

In accordance with these conventions, the etymology of *curfew* [OF. *cuevrefeu*, *covrefeu*, fr. *covrir* to cover + *feu* fire, fr. L. *focus* hearth.] will be read "*curfew* is from the Old French word spelled either *cuevrefeu* or *covrefeu*, which is derived from the Old French words *covrir* meaning 'to cover' and *feu* meaning 'fire'; *feu* is from the Latin word *focus* meaning 'hearth.'"

**6. The Definition** follows the etymology. Heavy-faced Arabic numerals (1., 2., 3., etc.) are used to number definitions when the meanings are numerous or are quite divergent from one another. Heavy-faced letters (a, b, c) are used to group meanings that are very closely related; thus, several special senses (as in *Botany* definitions) may be separately lettered and placed under one number. In general, the technical and scientific senses are arranged in the alphabetical order of their subject labels. So far as possible the order of definitions is that of the historical order of development of the meanings of a word.

**a.** Various kinds of cross references sometimes take the place of a definition. A mere spelling variant is entered thus:

*cañon*. Var. of *CANYON*.

A common term having the same meaning as some more technical term fully defined at its own place or a technical term having the same meaning as a common term fully defined is often entered in one of these two ways:

*founder*, *n.* *Veter.* = *LAMINITIS*.

*pertussis*, *n.* *Med.* Whooping cough.

A term whose meaning is recorded under the entry of some other term is (if it seems to require separate entry at its own alphabetical place) entered thus:

*Desdemona*, *n.* See *OTHELLO*.

**b. Labels**, or italic epithets, are prefixed (often in abbreviated form: see page xxi) to many definitions. *Subject Labels* (as *Law*, *Radio*, *Bot.*) show the depart-

ment of knowledge in which the word or the meaning occurs; *Usage Labels* (as *Colloq.*, *Dial.*, *Slang*) show its status in actual usage; *Geographical Labels* indicate the area in which (only or chiefly) it is used. When such labels follow the number or letter introducing a definition, they apply only to that definition; when they precede a number or letter they apply to everything that follows them.

**c. Cross References**, printed in SMALL CAPITALS, are made in order to guide the reader to further information. In such references in both the definitions and the etymologies: "See" leads to information that is either highly important or essential to an understanding of the meaning (see **boldface**, *n.*, and the etymology of *foible*); "Cf." means "compare," and leads to useful, interesting, or related material (see *impetus*, *i*; and the etymology of *nib*, *n.*). For the use of cross references in connection with synonyms and antonyms, see § 7, below.

A cross reference to one of two or more entries that are spelled alike, especially when the entries belong to the same part of speech, is sometimes by number thus:

**lamiaeceous**, *adj.* . . . See 1ST MINT.

When the entries are of different parts of speech, a cross reference to one is usually made by part-of-speech label, thus:

**field of force**. = FIELD, *n.*, 10.

Cross references to entries in the *Biographical Names* and *Gazetteer* sections of the back matter are indicated by means of the abbreviations *Biog.* and *Gaz.* in the reference.

**7. The Synonymy**, when given, is placed at the end of the entry and is introduced by the label **Syn.** Sometimes, it consists merely of a "word-finding" list of words of similar meaning, often with semicolons separating words that are synonyms in one sense from those that are synonyms in another sense. Sometimes the synonymy contains a full treatment of the distinction in meanings of a group of words, the words to be discriminated being printed in heavy-faced type (see *bodily*). A synonymy of this kind is printed as a separate paragraph, in distinctive type.

In the synonymy, a cross reference directs the reader to the entry where a full treatment is to be found. Thus, at **defame** the cross reference "See **MALIGN**" indicates that in the synonymy at **malign** the word *defame* is discussed.

**Antonyms**, when given, are in light-faced type, following the synonyms, and are introduced by the label **Ant.** The differences in meaning among antonyms are often discussed under the synonymy of another word to which a cross reference is given.

**8. Run-on Entries** are placed at the end of the paragraphed entries, with an intervening light dash. Such entries are usually derivative adjectives, adverbs, and nouns, and are of such a character that their meaning is easily inferred from the definition of the word to which they are attached (see *colonize*).

Often, when the run-on entry is the same word as the main entry but used as a different part of speech and requiring definition, the run-on entry consists only of a short heavy dash and the part-of-speech label (see *best*). The heavy dash is to be interpreted as standing for all spellings of the entry word if more than one is given (as: *color*, *colour*, *n.* . . . — *v. t.*).

In the *Gazetteer*, many proper adjectives and nouns derived from geographical names, and requiring no definition because their meaning is obvious, are run on after the appropriate entry chiefly for their spelling and pronunciation.

**9. Lists of Self-explanatory Combinations** are inserted frequently after prefixes and combining forms, and similar lists of combinations and phrases are sometimes given after nouns and adjectives (see *non-*, *over-*, *micro-*, *air*). These lists record the existence of hundreds of idiomatically formed expressions, and answer the question whether the terms included (and similar terms) are to be written or printed as hyphenated compounds, as solid compounds, or as two words.

These self-explanatory lists are rather illustrative than exhaustive. The list, for example, at **cross** shows the various ways of combining but by no means all existing combinations. The lists serve also as guides in the use of prefixes and combining forms, most of which, like *hyper-* and *multi-*, are free for use in forming new compounds at need.

**10. Compounds and Phrases.** Many two-word and three-word compounds, such as those consisting of an adjective (or an attributive noun) and a noun are given main vocabulary entry in their alphabetical place (see *flying buttress*, *mountain sheep*, *shore bird*). Combinations that belong naturally with some main vocabulary entry have generally, however, been treated at that entry. Thus, the terms *blue crane* and *sandhill crane* are both covered at the entry **crane** and not at their own alphabetical places. (See also *covenant*, *year*.) This method of treatment has permitted the inclusion of information about many two-word and three-word entries, especially names of varieties of plants and animals, that would otherwise have been omitted for lack of space.

**Verb phrases** are given following the entry of their verb, a group of such phrases being generally printed as a block paragraph alphabetically arranged (see *fall* and *make*).

**Prepositional phrases** are run on, following an em dash, after the most important word of the phrase.

**11. Illustrations.** The ratio of the size of figures of plants and animals shown in illustrations to natural size is usually indicated by a fraction in parentheses, as *whale* ( $\frac{1}{300}$ ), that is, the natural overall length is 300 times the  $1\frac{1}{2}$  inches of the figure, or  $37\frac{1}{2}$  feet. Where the illustration is larger than natural size, this fact is indicated by a multiple in parentheses, as *flea* ( $\times 8$ ), that is, the natural size is one eighth that of the figure shown.

ED (-kāt'ēd; -īd) -CAT'ING. [L. *ab-*

*ab-* + *dicare* to proclaim.] To give as sovereign power; to renounce; to sur-  
duty, right, etc. — *v. t.* To relinquish or renounce  
fice, dignity, or function. — *ab-di-ca-tion* (āb'dī-kā-shūn), *n.* — *ab-di-ca-tor* (āb'dī-kā-tōr), *n.*

*MYN.* Abdicare, renounce, resign mean to give up position of trust,  
honor, or glory. Abdicare implies a giving up of sovereign or inherent  
power; renounce, frequently used in place of *abdicate*, often suggests sac-  
rifice for a greater end; resign implies the giving up of an unexpired  
office or trust. — *ANL.* Usurp.

*ab-do-men* (āb-dō'mēn; āb'dō-mēn), *n.* [L.] 1. The part of the body  
between the thorax and the pelvis; the belly; also, the cavity of this  
part of the trunk, containing the stomach, intestines, liver, etc. 2.  
The posterior section of the body, behind the thorax, in insects and  
crustaceans. See INSECT, *ILLUSTR.* — *ab-dom'i-nal* (āb-dōm'ī-nāl), *adj.*  
— *ab-dom'i-nal-ly*, *adv.*

*ab-duce*' (āb-dū'sh), *v. t.* [L. *abducere*, fr. *ab-* + *ducere* to lead.] To

draw or conduct away.  
*ab-duc-tion* (āb-dūk'shūn), *adj.* *Physiol.* Abducting; — opposed to *ad-  
ductant*.

*ab-duct'* (āb-dūkt'), *v. t.* [L. *abductus*, past part. of *abducere* to lead  
away.] 1. To take away surreptitiously by force; usually, to kidnap;  
as, to *abduct* a child or a voter. 2. *Physiol.* To draw away, as a limb,  
from a position near or parallel to the median axis, as in raising the arm  
laterally. — *ab-duc-tor* (āb-dūkt'ōr), *n.*

*ab-duc-tion* (āb-dūkt'shūn), *n.* Act of abducting, or state of being ab-  
ducted; specif., under statutory law, the unlawful taking away of a  
woman for marriage or for immoral purposes; — as distinguished from  
*kidnaping*.

*a-beam'* (ā-bēm'), *adv.* *Naut.* On a line at right angles with a ship's  
keel; opposite the middle of a ship's side.

*a-be-o-dar'i-an* (ā-bē-ō-dār'ē-ān), *n.* [ML. *abecedarius*, fr. the  
names of the first four letters of the alphabet.] 1. One who is learning  
the alphabet; hence, a tyro. 2. One who teaches the rudiments of

*Syn.* Amateur, dilettante, dabbler, tyro (or tiro) mean one who follows a pursuit without proficiency or a professional purpose. Both amateur and dilettante originally implied a taste or liking for something rather than an expert knowledge of it. Amateur now often refers to one practicing an art without mastery of its essentials. In sports, however, the word does not suggest lack of skill but the status of one who plays without remuneration. Dilettante, on the other hand, now often implies elegant trifling in the arts, but many still use the term to name the lover of art rather than the skilled practitioner. Dabbler always implies desultory habits of work and lack of persistence; tyro implies inexperience and audacity with resulting incompetence or crudeness.

**ammine** (ám'mén; á-mén'), *n.* [ammonia + 2d. -ine.] *Chem* a molecule of ammonia,  $NH_3$ , as it exists in certain complex compounds called **am-mi-no com-pounds** (á-mé'nó; á-mí'nó) *b* An ammino compound.

**Am'món** (ám'món), *n.* [L., fr. Gr. *Ammon*, fr. Egypt. *Amen*.] 1. *Egypt. Relig.* Amen, the deity. 2. *Class. Relig.* An epithet of Zeus and Jupiter as worshipped in Egypt and Libya.

**am-mo-ni-a** (á-mó'ní-á; mó'nýá), *n.* [from sal ammoniac.] 1. *Chem.* A colorless gaseous compound of nitrogen and hydrogen,  $NH_3$ , of extremely pungent smell and taste. Ammonia can easily be condensed; cold and pressure to a colorless liquid boiling at  $-33.3^\circ C$ . 2. Popularly, the aqueous solution of the gas; called also *aqua ammoniac*, *ammonia water*, and *spirits of hartshorn*.

**am-mo-ni-ác** (á-mó'ní-ák), *n.* or **gum ammoniac**. [F., fr. L., fr. Gr. *ammoniakon* a gum said to distill from plants growing near the temple of Jupiter Ammon.] The aromatic gum resin of a Persian herb (*Desmodium ammoniacum*) of the carrot family. It is used as an expectorant and stimulant, and as a cement.

**am-mo-ni-a-cal** (ám'mó'ní-á-kál), *adj.* Also **am-mo-ni-ac**. Of or pertaining to ammonia; containing, or having the properties of, ammonia.

**am-mo-ni-ate** (á-mó'ní-át), *v. t.* To combine with ammonia.

**am-mo-ni-fy** (ám'mó'ní-fý), *adj.* Also **am-mo-ni-cal** (-í-kál). Of or pertaining to ammonia or the radical ammonium.

**am-mo-ni-f-ica-tion** (ám'mó'ní-fí-ká'shún), *n.* [ammonia + -fication.] 1. Impregnation with ammonia or ammonium compounds. 2. Decomposition with production of ammonia, esp. by the action of bacteria on nitrogenous organic matter. — **am-mo-ni-fy** (ám'mó'ní-fý), *v. t.* & *i.*

**am-mo-ni-te** (ám'mó'ní-tí), *n.* [L. cornu Ammonis horn of Ammon.] Paleontol. Any of numerous fossil shells of cephalopods having the form of a flat spiral, especially abundant in the Mesozoic era.

**am-mo-ni-um** (á-mó'ní-úm), *n.* *Chem.* A strongly basic radical,  $NH_4$ , whose compounds resemble those of the alkali metals. When ammonia reacts with acids, the salts of ammonium are formed, as **ammonium chloride** (or **sal ammoniac**),  $NH_4Cl$ , used as a source of ammonia, **ammonium nitrate**,  $NH_4NO_3$ , used in explosives and as a fertilizer, **ammonium sulfate**,  $(NH_4)_2SO_4$ , used as a fertilizer and as a source of ammonium compounds.

**ammonium hydroxide** *Chem.* A compound,  $NH_4OH$ , formed when ammonia dissolves in water, and existing only in solution.

**am-mu-ni-tion** (ám'mú-ní-sh'én), *n.* [F. *amunition*, formerly used for *munitio*. See *MUNITION*.] 1. In warfare, the projectiles thrown against an enemy, such as bullets, shells, grenades, and bombs, with their necessary propellants, detonators, fuses, and primers. 2. **analogue computer**. A type of calculating machine that operates with numbers represented by directly measurable quantities as voltages, resistances, rotations, etc.

**an-a-lo-gy** (ān-āl-ō-jī), *n.* *pl.* -GIES (-jīz) 1. A relation of likeness, between two things or of one thing to or with another, consisting in the resemblance not of the things themselves but of two or more attributes, circumstances, or effects. 2. Biol. Correspondence in function between organs or parts of different structures and origin; — distinguished from *homology*. 3. Logic. A form of inference in which it is reasoned that if two (or more) things agree with one another in one or more respects, they will (probably) agree in yet other respects. 4. Philol. The principle or process in accordance with which existing words are modified or new words created in conformity with familiar word groups. — *Syn.* See LIKENESS.

**an-a-lyse**, **an-a-lyse**, etc. Vars. of ANALYZE, etc.

**an-a-ly'sis** (ān-āl'ī-sīs), *n.* *pl.* -SES (-sēz) [ML, fr. Gr. *analysis*, fr. *analyein* to unloose, to resolve, fr. *ana* up + *lyein* to loose.] 1. Separation of anything into constituent parts or elements; also, an examination of anything to distinguish its component parts or elements, separately or in their relation to the whole. 2. A form of statement, as a syllogism, exhibiting the results of a process of analysis. 3. Chem. a The separation of compound substances, by chemical processes, into their constituents. b The determination of one or more ingredients of a substance either as to kind (*qualitative analysis*) or amount (*quantitative analysis*). 4. Math. a The investigation of problems by the methods of algebra. b Generally, any of those methods that are based on considerations of number and the theory of limits, as opposed to geometric intuition. 5. *Psychoanalysis*. Diagnosis and treatment. — *Syn.* Resolution, dissection, breakdown.

**an-a-lyst** (ān-āl'īst), *n.* One skilled or occupied in making analyses.

**an-a-lyt'ic** (ān-āl'ī-tīk), **an-a-lyt'i-cal** (-ī-kāl), *adj.* [From ML, fr. Gr. *analytikos*] 1. Of or pertaining to analysis or analytics; resolving into elements or constituent parts. 2. Treating of, or given to the use of, analysis. — **an-a-lyt'i-cal-ly**, *adv.*

**analytical table**. Bot. & Zool. = KEY, *n.*, 9 a.

**analytic geometry**. Math. Geometry subjected to analytic treatment by means of the convention of co-ordinates.

**an-a-lyt'ic** (ān-āl'ī-tīk), *n.* *see* -ICS 1. The science of analysis, esp. as a subdivision of logic. 2. = ANALYTIC GEOMETRY.

**an-a-lyze**, **an-a-lyso** (ān-āl'īz), *v. t.* 1. To separate, resolve into elements or constituent parts. 2. To separate mentally the parts of (a whole) so as to reveal their relation to it and to one another; as, to *analyze* an economic theory. 3. To study the factors of (a situation, problem, or the like) in detail, in order to determine the solution or outcome. 4. To subject to scientific or grammatical analysis. — **an-a-lyz'a-ble**, **an-a-lyz'a-ble** (-īz-ā-b'l), *adj.* — **an-a-lyz'er**, **an-a-lyz'er** (-īz-ēr), *n.* — **an-a-lyz-a'tion** (-īz-ā-shūn; -īz-ā-shūn), *n.*

*Syn.* Analyze, resolve, dissect, break down mean to divide a complex whole or unit into its components or constituents. Analyze presupposes a personal agent and an attempt to discover the true nature or inner relationships of something that does not superficially reveal them, such as a material substance, an intellectual construction, or the like; resolve may or may not presuppose a personal agent, and it usually suggests an actual separation into elements or parts (as of oxygen and hydrogen, into which the water is being resolved by an electric current); dissect literally implies a separation into component parts but, figuratively, a searching analysis; break down, the most concrete of these terms, implies a reduction to simpler parts or divisions (thus, proteins are broken down by enzymes into amino acids).

**an-an'drous** (ān-ān'drūs), *adj.* [*an-* not + *-androus*.] Bot. Having no stamens.

**An-a-n'ias** (ān-ā-n'ās), *n.* A follower of the apostles who with his wife, Sapphira, was struck down for lying (*Acts* v); hence, a liar.

**At-lan-to-an** (ă-tlăn-'tŏn), *adj.* [L. *Atlantĭcus*.] Pertaining to, or resembling, Atlas; strong.

**at-lan'-tes** (ă-tlăn-'tēz), *n. pl.; sing. ATLAS (ĭt'lds). [L. See **ATLAS**.] Arch. Figures or half figures of men, used as supporting columns or pilasters; telamones. Cf. **CARYATID**.*

**At-lan'tic** (ă-tlăn-'tĭk), *adj.* [L. *Atlantĭcus*.] 1. Of or pert. to Atlas. 2. Designating, pert. to, or bordering upon, the Atlantic Ocean.

**Atlantic Charter** A declaration (made August 14, 1941, at a meeting in the North Atlantic) by President Roosevelt and Prime Minister Churchill of eight principles in the national policies of the U. S. and Great Britain, including disavowal of territorial rearrangement, restoration of sovereign rights and self-government, equal access to raw materials, freedom of the seas, disarmament of aggressor nations.

**Atlantio, or Atlantic standard, time**. See **STANDARD TIME**.

**At-lan'tis** (ă-tlăn-'tīs), *n.* A traditional island west of the Pillars of Hercules, said by the ancients to have been sunk beneath the ocean by an earthquake.

**At-las** (ă-tlăs), *n.; pl. (except in sense 2) ATLASES (-ēz; -īz). [L. *Atlas*, *antis*, fr. Gr. *Atlas*, fr. root of *ēnai* to bear.] 1. *Gr. Myth.* In Homer, a divinity in charge of the pillars which upheld the heavens; usually, a Titan forced to support the heavens on his head and hands; later, a king metamorphosed into a lofty mountain. Hence, the bearer*

of a great burden. 2. [not cap.] Sing. of **ATLANTES**. 3. [not cap.] *Anat.* The first vertebra of the neck. 4. [not cap.] A collection of maps in a volume; — said to have been named from a picture of Atlas supporting the world. 5. [not cap.] A work in which subjects are exhibited in a tabular form or arrangement. 6. [not cap.] A large size of paper.

**At'li** (ă'tlĭ), *n.* [ON. *Atli* Atilla.] *Norse Myth.* A king who marries Gudrun after Sigurd's death. She slays him to avenge his treachery to her brothers.

**at'man** (ă'tmăn), *n.* [Skr. *ātman* breath, self.] *Hinduism.* a. The life principle, soul, or individual essence. b. [cap.] The universal ego whence all individual selves arise.

**atmo-**. [Gr. *atmos*.] A combining form meaning *steam, vapor*, as in *atmosphere*.

**at'mos-phere** (ă'tmŏs-'fēr; 27), *n.* [atmo- + Gr. *sphaira* sphere.] 1. The whole mass of air surrounding the earth; also, the gaseous envelope of any celestial body; as, the *atmosphere* of Mars. 2. A surrounding or pervading influence; as, the social *atmosphere* of a place. 3. The air in any locality; as, a moist *atmosphere*. 4. The aesthetic tone or mood of, or harmony of effects in, a work of art; as, a novel rich in *atmosphere*. 5. *Physics.* The pressure of the air at sea level (about 14.7 pounds to the square inch), used as a unit.

**at'mos-pher'ic** (-fēr'ik), *adj.* 1. a. Of or pertaining to the atmosphere; as, *atmospheric* air, *atmospheric* pressure. b. Caused, or operated on, by the atmosphere; pneumatic; as, an *atmospheric* engine. 2. Of, possessing, or imparting, atmosphere or an atmosphere. — **at'mos-pher'i-cal** (-lĕ-kăl), *adj.* — **at'mos-pher'i-cal-ly**, *adv.*

**at'mos-pher'ics** (-lĕks), *n. pl.*, or *atmospheric disturbances*. **Radio**. **STATIC**.

**at'oll** (ă'tŏl; ă-tŏl'), *n.* [Maldivian *atolu*.] A coral island or islands, consisting of a reef surrounding a lagoon.

**at'om** (ă'tŏm), *n.* [From *atomos*, fr. Gr. *atomos* uncut, indivisible, as *n.*, atom, fr. *a-* not + *tomos* cut.] 1. One of the minute particles postulated in atomism. 2. A particle; jot. 3. *Chem. & Physics.* The smallest particle of an element. See **ATOMIC THEORY**.

**a-tom'ic** (ă-tŏm'ik), *adj.* Also **a-tom'i-cal** (-lĕ-kăl). 1. Of or pert. to atoms, atomic energy, or atomic bombs. 2. Very minute; tiny. 3. *Phys.* *Chem.* Separated into atoms; as, *atomic* hydrogen. — **1-cal-ly**, *adv.*

**atomic, or atom, bomb**. Also **A-bomb'** (ă'bŏm'), *n.* A bomb whose violent explosive power is due to the sudden release of atomic energy. The release results from the splitting, or fission, of heavy nuclei (plutonium, uranium) by bombardment with particles (neutrons).

**atomic energy**. Energy liberated by changes in the nucleus of an atom, as by fission of a heavy nucleus or condensation of light nuclei into heavier ones with accompanying loss of mass.

**at'o-mic-ity** (ă'tŏm-ĭs'it), *n.* 1. *Chem.* A valence. b. The number of atoms in the molecule of an element. c. The number of replaceable atoms or groups in the molecule of a compound. 2. *Physics & Chem.* The state of consisting of atoms.

**atomic mass**. *Chem.* The relative mass of an atom, expressed on the scale  $O^{16}$  (oxygen) = 16. For each isotope its value is very close to an integer called the *mass number*.

**atomic number**. *Chem.* A number, experimentally determined, denoting the position of an element in a series of increasing complexity (starting with 1 for hydrogen). See **ELEMENT, Table**. An arrangement of the elements in the order of these numbers and with regard to the periodic variation in their properties is called the *periodic table* (which see). **Abbr.** *at. no.*

**atomic pile**. See **PILE, n. 5**.

**atomic theory or hypothesis**. *Chem. & Physics.* The theory that all material substances are composed of minute particles or atoms of a limited number of kinds; hence, any theory concerning the structure of the atom. According to modern discoveries, the atom is now regarded not as an ultimate particle but as a system consisting of a small dense nucleus having a positive electric charge of 1 to 92 or more (depending on the kind of atom) and 1 to 92 or more electrons surrounding it in concentric "shells." The nucleus is considered a combination of protons and neutrons. Atoms of the same element can have different weights (see *ISOTOPE*) but resemble one another very closely in chemical properties. See **ELEMENT, PERIODIC TABLE**.

**atomic weight**. *Chem. & Physics.* The relative weight of the atom of an element, referred to that of some element, as oxygen or hydrogen, as standard. The usual chemical standard is 16 for oxygen (the natural mixture of isotopes). **Abbr.** *at. wt.* See **ELEMENT, Table**.

**at'om-ism** (ă'tŏm-'iz-m), *n.* *Philos.* The doctrine that the universe is composed of simple, indivisible, and minute particles (atoms). — **at'om-ist** (-ist), *n. & adj.* — **at'om-ist-ic** (-lĕ-'is-tik), *adj.*

**at'om-ize** (-īz), *v. t. & i.* 1. To reduce to atoms or to fine particles, usually in a spray; hence, **at'om-ize** or **-ize** (-īz-ēr), *n.* 2. To view or treat as made up of discrete or atomistic units.

**atom smasher**. Popularly, any of the accelerators used in nuclear physics, as a cyclotron or a Van de Graaff generator.

**at'o-my** (ă'tŏ-'mī), *n.; pl. -mies* (-mīz) An atom; mite.

**at'o-my, n.** [From *atomos*, taken as an *atomy*.] *Obs. &zo. Jocular.* A skeleton.

**a-ton'al** (ă-tŏn'ăl; -'l), *adj.* [See **A-not**.] *Music.* Characterized by atonality — **a-ton'al-ly**, *adv.*

**a-ton'al-ism** (-lĕ-'iz-m), *n.*

**atony**. — the characteristic or a style of composition in which the material is organized without reference to key or tonal center, using impartially the tones of the chromatic scale in a strongly dissonant way.

**1-tone'** (ă-tŏn'), *v. t. & i.* [From *at one* (see under **AT**), with *pron. ōn* as in *ME*.] 1. *Obs.* To reconcile or make reconciliation. 2. To make amends, as for an offense or deficiency; to expiate. — **a-ton'er** (-tŏn'ēr), *n.*

**a-tone'ment** (-mĕnt), *n.* 1. *Archaic.* Concord; reconciliation. 2. Satisfaction; gratification.

**Atan Science**. The exemplification of man's unity with God, whereby man reflects divine Truth, Life, and Love. *ary* **Baker Eddy**.

**Atonement, Day of.** See *Yom Kippur*, under JEWISH HOLIDAYS.

**a-tonic** (á-tón'ik), *adj.* 1. *Med.* Characterized by atony; as, an atonic disease. 2. *Gram.* Unaccented; as, an atonic syllable. 3. *Phonet.* Without tone or vocalicity; voiceless. — *n.* 1. *Gram.* A word or syllable with no accent. 2. *Phonet.* A voiceless consonant.

**at-on-y** (át'ón-y), *n.* [From *ML.*, fr. *Gr.* atonia slackness, deriv. of *a-not + tonos* tone.] 1. *Med.* Lack of tone, or vital energy; weakness of the system or of an organ. 2. *Phonet.* Weakness from lack of stress, or accent.

**a-top** (á-tóp'), *adj. & adv.* On, at, or to the top. — *prep.* On the top of.

**at-ra-bil-i-ous** (á-trá-bil'í-ús), *adj.* [From *L. atra bilis* black bile.] Affected by "black bile," or melancholy; hypocholemiac. — **at-ra-bil-i-ty** (-í-ti), *adj.* — **at-ra-bil-i-ous-ness**, *n.*

**A-trous** (á-tró's; á-tró's), *n.* A king of Mycenae, son of Pelops and father of Agamemnon and Menelaus (hence called the A-trí-das (á-trí-dé)). His brother Thyestes seduced his wife and plotted his death. Atrous, feigning reconciliation, killed three sons of Thyestes and served them to him at a banquet.

**a-trip** (á-tríp'), *adj.* *Naut.* Just above clear of the ground; aweigh; — of an anchor.

**a-tri-um** (á-trí-úm; á-), *n.; pl.* ATRIA (-á). [L.] 1. *Rom. Antig.* The chief room in a house. 2. *Anat. & Zool.* Any of various cavities or chambers; esp., the main part of an auricle of the heart or, sometimes, the entire auricle. See HEART, III.

**a-tro-cious** (á-tró'shús), *adj.* [L. *atrox*, *atrocis*, cruel, fierce.] 1. Savagely brutal; outrageously cruel or wicked. 2. *Colloq.* Very bad; abominable. — *Syn.* See OUTRAGEOUS. — **a-tro-cious-ly**, *adv.* — **a-tro-cious-ness**, *n.*

**a-tro-ci-ty** (á-tró'sí-ti), *n.; pl.* -TIES (-tíz). State or quality of being atrocious; also, an atrocious deed.

**a-troph-ic** (á-tróf'ik), *adj.* Relating to atrophy.

**at-ro-phied** (á-tró-fí-d), *adj.* Wasted; emaciated.

**at-ro-phy** (-í), *n.* [From *L.*, fr. *atrophia*, fr. *a-* not + *trephain* to nourish.] 1. A wasting away from lack of nourishment or from disuse. 2. *Biol.* Arrested development of a part or organ incidental to the normal development of an animal or plant. — *n.* 1. & *t.* — **PHY-** (-fí): — **PHY-ING**. To undergrow, or cause to undergrow, atrophy.

**at-ro-pine** (á-tró-pén; -pín), *n.* Also **at-ro-pin**. [From *Atropa*, a generic name of belladonna.] A poisonous, white, crystalline alkaloid,  $C_{17}H_{19}NO_3$ , extracted from belladonna and other nightshades, used to dilate the pupil of the eye, to relieve spasms, etc.

**at-ro-pism** (-plz'm), *n.* Poisoning by atropine.

**at-ro-pos** (á-tró-pós), *n.* [Gr., fr. *atropos* not turning, inflexible.] *Gr. Myth.* One of the Fates (see FATE, *n.*, 4).

**ATS** (á-té's; á-ts), *n.* The Auxiliary Territorial Service, women's auxiliary to the British Army from 1941, incorp. into the Army in 1949 as the WRAC.

**at-tach** (á-tách'), *v. t.* [OF. *atacher*, fr. *a* to + a word akin to *F.* lack a small nail.] 1. To take by legal authority, esp. under a writ, as a means of enforcing payment of a debt. 2. *Obs.* To take; attack. 3. To bind; fasten; tie; connect. 4. To bind by personal ties, as of affection, sympathy, etc. 5. To assign by authority; to appoint. 6. To attribute; ascribe; as, to attach importance to an event. 7. To associate as a property or adjunct. — *Syn.* See FASTEN — **Ant.** Detach. — *v. i.* To adhere; be attached. — **at-tach'a-ble**, *adj.*

**at-tach-é** (á-tá-shé; or, *Brit.*, á-tách'a; *F.* á-tá-shé'), *n.* [F.] A member of the diplomatic staff of an ambassador or minister.

**attached** (á-tách't), *past part. & part. udy.* of **ATTACH**, *v.* Hence, specif., *Zool.*, permanently fixed when adult, as a barnacle or oyster; — *opp.* to *free-swimming*.

**at-tach-ment** (á-tách'mént), *n.* 1. *Law.* An attaching by legal process, also, the writ commanding such seizure. 2. State of being attached by personal ties; fidelity; regard. 3. An attaching or being attached by physical connection, as an adjunct, or by association. 4. That by which one thing is attached to another; as, the attachments of a muscle. 5. Something attached; some adjunct attached to an instrument, machine, or other object. — *Syn.* Affection, love.

**at-tack** (á-ták'), *v. t.* [F. *attaquer*, fr. *il* attack, of the same origin as *F.* *attaquer*. See **ATTACK**.] 1. To fall upon with force; to assault. 2. To assail with unfriendly speech or writing; censure. 3. To set to work upon; tackle. 4. To begin to affect, to begin to act upon injuriously. — *v. i.* To make an onset or attack.

*Syn.* Attack, assault, assault, bombard, storm mean to make an onset upon. Attack implies aggression or aggressiveness and literally or figuratively the initiation of a struggle with the person or thing to be mastered; assault implies an attempt to break down resistance by repeated blows, shots, thrusts, etc.; assault always suggests direct confrontation and an attempt to overpower by suddenness and violence of onslaught; bombard, literally to assail with bombs or shells, in extended use carries a strong implication of continuous pestering; storm suggests an attempt to sweep from the path every obstacle to victory.

— *n.* 1. Act of attacking; onset; assault; — opposed to *defense*. 2. Offensive or antagonistic action; specif., an access of disease or fit of sickness. 3. A setting to work upon some task, etc.; beginning of action. 4. A body of persons participating in an offensive action. 5. *Music.* Initiation of performance, esp. with the degree of unanimity with which a phrase is begun by the several performers in an ensemble group. — *Syn.* Assault, onslaught, onset.

**at-tain** (á-tán'), *v. t.* [From stem of OF. *atindre*, fr. *L. attingere*, fr. *ad* + *tangere* to touch, reach.] 1. To achieve or accomplish, or reach by effort; gain; compass; as, to attain one's ends. 2. To reach or come to by progression or motion; arrive at; as, to attain a ripe old age. — *Syn.* See REACH. — *v. i.* To come or arrive by motion, growth, or effort; reach; — usually with *to* or *unto*.

**at-tain'a-ble** (á-b'l), *adj.* That may be attained. — **at-tain'a-ble-ly** (-b'l-í), *adv.* — **at-tain'a-ble-ness**, *n.*

**at-tain-er** (á-tán'ér), *n.* [OF. *atandre* to accuse, convict.] 1. Act of attaining, or state of being attained; also, result of attaining; specif.: a extinction of the civil rights and capacities of a person, on sentence of death or outlawry. A bill of attainder is a legislative act which inflicts the consequences of attainder without a judicial trial. Cf. **CONFESSION** or **ALLOD**. — *Shak.* Dishonor.

**at-tain-ment** (á-tán'mént), *n.* 1. Act of attaining. 2. That which is attained; a mental acquirement. — *Syn.* See ACQUIREMENT.

**at-tain't** (á-tánt'), *v. t.* — **TAINT**; — **TAINTED**; — **TAINTING**. *Archaic past part.* of **TAINT**. [OF. *ataint*, past part. of *ataindre*. See **ATTAINDE**.] 1.

a To prove guilty. b *Archaic*. To accuse. 2. To affect by attainder. 3. *Rare*. To affect or infect; taint; corrupt. 4. To stain; sully; disgrace. — *n.* 1. *Archaic*. A touch; a touch in tainting. 2. Attainder. 3. A stain or taint; disgrace.

**at-tain'ture** (á-tán'túr), *n.* Attainder; also, disgrace.

**at-tar** (át'tér), *n.* [Per. 'atar, fr. Ar. 'atir perfume, essence.] A perfume obtained from flowers; esp., a fragrant volatile oil distilled from rose petals, esp. of the damask rose.

**at-tem-per** (á-tém-pér), *v. t.* [OF. *attemper*, fr. *L. attemperare* See **AT**; **TEMPER**.] 1. To reduce, modify, or moderate by mixture; regulate temperature. 2. To soften; soothe; temper. 3. To accommodate; attune.

**at-tempt** (á-témpt'; 89), *v. t.* [OF. *atenter*, fr. *L. attentare* to at-

tempt, *v.* — *n.* 1. Act of attempting, trial, or endeavor; esp., an unsuccessful effort; also, an attack; assault. — **at-tempt'a-ble** (-témpt'-á-b'l), *adj.*

*Syn.* Attempt, try, endeavor (or endeavour), essay, assay, strive, struggle mean to make an effort to accomplish an end. Attempt implies an actual beginning of or venturing upon, often also suggesting failure; try, in precise use, suggests effort or experiment made in the hope of ascertaining facts or of testing or proving something (as, to try to find a better method); endeavor heightens the implications of exertion and difficulty; essay and the now less common assay imply great difficulty but also suggest tentative effort or experiment; strive and struggle carry not only implications of great exertion but of greater opposition to be overcome, strive specifically suggesting persistence, and struggle suggesting straining.

**at-tend** (á-ténd'), *v. t.* [OF. *attendre*, fr. *L. attendere* to stretch (sc. animum) to apply the mind to, fr. *ad* + *tendere* to stretch.] 1. *Archaic*. To heed; listen to; as, attend my words. 2. To care for; take charge of; as, to attend machinery. 3. To go or stay with, as a servant; to visit, as a doctor, escort; wait on; serve. 4. To be present with; accompany; as, attended with ill effects. 5. To be present at; as, to attend church. 6. *Archaic*. To wait for; await. — *Syn.* See **ACCOMPANY**. — *n.* 1. To apply the mind; pay attention; listen; as, attend to these directions. 2. To apply oneself; as, attend strictly to business. 3. To take charge (of); look (after); as, I'll attend to the matter. 4. To be ready for service; to wait; as, to attend upon the committee. 5. *Obs.* To wait; stay; delay.

**at-tend'ance** (á-ténd'áns), *n.* 1. Act or fact of attending. 2. The persons attending; spect.; a Retinue; attendants. b The persons, or number of persons, present on a given occasion.

**at-tend'ant** (-dánt), *adj.* Attending; accompanying; following as a consequence; as, attendant circumstances or evils. — *n.* 1. One who attends. 2. That which accompanies; a concomitant.

**at-ten't** (á-tént'), *adj.* [L. *attentus*, past part. of *attendere*. See **ATTEND**, *v.*] Attentive; heedful. — *n.* Attention. *Obs.* — **at-ten't-ly**, *adv.*

**at-ten'tion** (á-tén'shún), *n.* [L. *attentio*] 1. Act or state of attend- ing or heeding; special consideration. 2. Power of giving attention (in sense 1). 3. Observation with a view to action; notice; observant care.

4. An act of civility or courtesy; specif., often *pl.*, the addresses of one who is courting. 5. *Met.* The attitude of readiness for action on receiving orders, assumed in response to the command "attention."

*Syn.* Attention, study, concentration, application mean the direct focusing of the mind upon something. Attention is applicable to the faculty or power as well as to the act but carries, apart from the context, no implication of quality or duration; study, on the other hand, stresses continuity and closeness of attention, as in acquiring knowledge, the analysis of something complex or confusing, or the like; concentration emphasizes the centering of attention on one thing to the exclusion of everything else; application usually suggests persistence in fixing one's attention and assiduity in the performance of what is required.

**at-ten-tive** (tív), *adj.* 1. Heedful; intent; observant. 2. Heedful of the comfort of others; courteous. 3. Paying attentions as one court one. — *Syn.* See THOUGHTFUL. — **at-ten-tive-ly**, *adv.* — **at-ten-tive-ness**, *n.*

**at-ten'u-ant** (á-tén'u-ánt), *adj.* [L. *attenuans*, pres. part. of *attenuare*. See **ATTENUATE**.] Med. Making thin, as fluids; diluting; attenuating. — *n.* A diluent.

**at-ten'u-ate** (-ái), *v. t.* [L. *attenuatus*, past part. of *attenuare*, fr. *ad* + *tenuare* to make thin, fr. *tenuis* thin.] 1. To make thin or slender. 2. To thin in consistency; dilute; rarely. 3. To lessen the amount, force, or value of; weaken. 4. *Bacteriol.* To reduce the virulence of; as, an attenuated strain. — *v. i.* To become thin, fine, or less. — (-ái), *adj.* Attenuated. — **at-ten'u-a-ble** (-á-b'l), *adj.* — **at-ten'u-a-tion** (-á-shún), *n.*

**at-test** (á-tést'), *v. t.* [F. *attester*, fr. *L.*, fr. *ad* + *testari* to bear witness, fr. *testis* witness.] 1. To affirm to be true or genuine; specif., to authenticate by signing as a witness; also, authenticate officially. 2. To be proof of; to manifest. 3. To put (one) on oath. — *v. i.* To bear witness; testify; — often with *to*. — *n.* Testimony; attestation. — **at-test'ant** (á-tést'ánt), *adj.* — **at-tes-ta-tion** (á-tés-tá-shún), *n.*

**at-tic** (át'ík), *n.* [In sense a fr. *F. attique*, orig. meaning Attic.] 1. A low story or wall above the main order of a façade, in the classical styles. 2. A room or rooms behind that part of the exterior; hence, the part of a building next to the roof.

**At-tic** (át'ík), *adj.* [L. *atticus*, fr. *Gr. Attikos*] 1. Of or pertaining to Attica, or Athens, in Greece; Athenian. 2. Marked by qualities characteristic of the Athenians; — applied to literary or artistic style, simple, pure, and refined; classical. See **GREEK**, *n.*, 4. — *n.* 1. An Athenian. 2. The dialect of Attica, noted for its purity and elegance; standard Greek.

**At-tic-ism**, **at-tic-ism** (át'ís-iz'm), *n.* A peculiarity or characteristic of Attic Greek. See **ATTIC**, *n.*, 2.

**At-tic-ize**, **at-tic-ize** (-síz), *v. t. & i.* [Gr. *attikizein*.] To conform to the language, customs, etc., of Attica.

**Attic wit**, **Attic wit**. Poignant, delicate wit.

**at-tire** (á-tí-r), *v. t.* [OF. *atirier*.] To dress; array; adorn; esp., to clothe with elegant or splendid garments. — *n.* 1. Dress; clothes; or- namental clothing. 2. The antlers, or antlers and scalp, of a stag or buck.

**at-tire-ment** (-mént), *n.* Attire

**at-ti-tude** (át'í-túd), *n.* [F., deriv. of *L. aptus* suited.] 1. Posture;

positi... or studied to serve a purpose; as, a threatening attitude; or bearing as indicating action, feeling, or mood; as, keep a... attitude; hence, the feeling or mood itself; as, a kindly attitude.

**at-ti-tu-din-ize** (ă-tî-tû-dî-nî-z), *v. i.* To assume attitudes; pose.

**at-torn'** (ă-tôr-n), *v. i.* [OF *atornor* to direct, atorn, fr. a to + *turner* to turn.] **1** A feudal lord. To turn or transfer homage and service to another as lord. **2** Modern Law To agree to become tenant to another as owner or landlord. — **at-torn-ment**, *n.*

**at-tor-ney** (ă-tôr-n), *n.*; pl. *-NEYS* (-nîz). [OF *atornor*, past part.] **1** Obs. A deputy or agent. **2** Law. One who is legally appointed by another to transact any business for him; specif., a legal agent (an attorney at law) qualified to act for suitors and defendants in legal proceedings. Abbr. *att'y*. — *Syn.* See AGENT; LAWYER. — **at-tor-ney-ship**, *n.*

**at-tor-ney gen'-er-al** (ă-tôr-n' jên-er-ăl); pl. ATTORNEYS GENERAL OF ATTORNEY GENERALS. Law. The chief law officer of the state, empowered to act in all litigation in which the law-executing power is a party, and to advise the supreme executive whenever required.

**at-trac't** (ă-trăkt'), *v. t.* [*attractus*, past part. of *atrahere*, fr. *ad-* + *trahere* to draw.] **1** To draw to; cause to approach or adhere; act upon by attraction. **2** To draw by influence of an aesthetic or emotional kind; fix, as the mind, attention, etc.; invite; allure; as, to attract admirers. — *v. i.* To exercise attraction. — **at-trac't-a-ble**, *adj.* — **at-trac't-a-ble-ness**, *n.*

*Syn.* Attract, allure, charm, fascinate, bewitch, enchant, captivate mean to draw another compellingly or irresistibly. Attract is broader in its meaning than the others, referring not only to persons but to things, and usually suggests a quality such as magnetism in that which draws, or an affinity for or a susceptibility to in the one that is drawn; allure implies enticement by that which is fair, pleasing, seductive, or the like; charm implies a power in the agent to cast a spell over the person or thing affected, compelling him or it to respond; fascinate, bewitch, enchant likewise suggest a magical influence, but fascinate tends to stress the effect of resistance, bewitch a succumbing to the influence, and enchant, ecstatic admiration; captivate implies merely an attraction that evokes delight or admiration.

**at-trac'tion** (ă-trăkt-shŭn), *n.* **1** Act, process, property, or power of attracting; specif., personal charm. **2** An attractive quality, object, or feature. **3** Physics A force acting mutually between particles of matter, tending to draw them together and resisting their separation.

*Syn.* Attraction, affinity, sympathy mean the relationship existing between things (sometimes persons) that are involuntarily or naturally drawn together. Attraction implies the possession by one thing of a quality, or qualities, that pulls another thing to it, often into contact or adherence; affinity implies the possession by the thing that is drawn of a susceptibility (a predisposition, a natural inclination, etc.), for it that forces it to approach or come into contact with the other; sympathy implies a reciprocal or natural relation between things that are susceptible to the same influences, as, attraction is the force by which a magnet draws iron to it; iron is one of the few metals that have an affinity for the magnet; the tides rise and fall in sympathy with the moon.

**at-trac'tive** (ă-trăkt'iv), *adj.* Having the power or quality of attracting; specul., charming. — **at-trac'tive-ly**, *adv.* — **at-trac'tive-ness**, *n.*

**at-trac'tor** (ă-trăkt'), *n.* One who or that which attracts.

**cal'ci-fy** (kāl'sl-fī), *v. t. & i.* -FYED (-fīd); -FY'ING. To make or become stony or calcareous by the deposit or secretion of lime salts.

**cal'ci-mine** (kāl'sl-mīn; -mīn), *n.* Also **kal'so-mine** (kāl'sō-). [L. *calx*, *calcia*, lime.] 1. A white or colored wash for a ceiling or other interior plastering. — *n.* 1. To wash or cover with calamine.

**cal'cine'** (kāl'sīn; kāl'sīn; -sīn), *v. t. & i.* [F. *calciner*, fr. L. *calx*, *calcia*, lime.] 1. To make or become powdery by action of heat. 2. To oxidize, as by heat. 3. To fry. — **cal'ci-na-tion** (kāl'sl-nā'sh'ūn), *n.* — **cal'cin-a-to-ry** (kāl'sl-nā'tō-ri; -tō-ri; kāl'sl'n-), *adj.* & *n.*

**cal'ci-phil** (kāl'sl-fīl; -fīl), *n.* [*calci-* + *-phil-*] = **CALCIPHILE**.

**cal'cip'hil-ous** (kāl'sl-fīl-ūs), **cal'ci-phil'ic** (kāl'sl-fīl'īk), *adj.*

**cal'ci-phobe** (kāl'sl-fōb), *n.* [*calci-* + *-phobe-*] = **CALCIPHOB**.

**cal'cip'hob-ous** (kāl'sl-fōb-ūs), **cal'ci-pho'bic** (kāl'sl-fōb'īk, fōb'īk), *adj.*

**cal'cite** (kāl'sīt), *n.* [L. *calx*, *calcia*, lime.] Mineral. Calcium carbonate, CaCO<sub>3</sub>, crystallized in hexagonal form, thus distinguished from aragonite. It includes common limestone, chalk, and marble.

**cal'ci-um** (kāl'sī-ūm), *n.* [NL., fr. L. *calx*, *calcia*, lime.] Chem. A silver-white soft metallic element occurring only in combination. Symbol, Ca; at. no., 20; at. wt., 40.08.

**calcium carbide**. A crystalline solid, CaC<sub>2</sub>, often resembling gray limestone, used for generating acetylene, etc.

**calcium carbonate**. A solid, CaCO<sub>3</sub>, occurring in nature as calcite and aragonite and found also in plant ashes, bones, shells, etc., and widely used in making lime and portland cement.

**calcium chloride**. A crystalline compound, CaCl<sub>2</sub>, used, in its anhydrous state as a white porous solid, as a drying agent, to lay dust, etc.

**calcium cyanamide**. Also **id.** Chem. A compound, CaCN<sub>2</sub>, obtained in impure, cokelike form by passing dry nitrogen over calcium carbide at 1200° C. (2190° F.), and used as a fertilizer and as a source of other nitrogen compounds.

**calcium light**. = **LUXLIGHT**, *n.*, 1.

**calcium phosphate**. See **PHOSPHATE**.

**calo'-sin'ter** (kāl'sl'n'tēr), *n.* [G. *kalksinter*, fr. *kalk* lime + *sinter* sinter.] Calcareous sinter.

**calo'-spar'**, **calo'spar'** (-spūr'), *n.* Calcite.

**calo'-tuf'a** (-tūf'a; -tūf'a), **calo'-tuff'** (-tūf'), *n.* Calcareous tufa.

**cal'on-la-bile** (kāl'ō-lā-b'l), *adj.* 1. Subject to, or ascertainable by, calculation. 2. Dependable; reliable.

**cal'on-late** (-līt), *v. t.* [L. *calculus*, past part. of *calculari* to calculate, fr. *calculus* a stone used in reckoning, fr. *calx*, *calcia*, limestone.] 1. To determine by mathematical processes. 2. To design or adapt for a purpose; as, *calculated* to succeed. 3. Colloq., U.S. To plan; expect; "reckon."

**Syn.** Calculate, compute, estimate, reckon mean to determine something mathematically. Calculate is preferred when highly intricate processes are followed and when the result, because of difficulties involved, is problematical; compute is the simpler term, implying a simpler arithmetical process and an exact result; estimate, as here compared, is used only of costs, etc., determined in advance and, therefore, usually implies approximate exactness in the result; reckon, often colloquial for compute, usually implies a rough-and-ready process, such as mental figuring.

It has a remarkable property of forming complex compounds, because of the ability of its atoms to unite into chains or rings. 2. A piece of carbon paper; also, a carbon copy. 3. *Elec.* A carbon rod used in an arc lamp; also, a plate of carbon used as one of the elements of a voltaic battery. — *adj.* Of, pert. to, resembling, or treated with carbon.

**car'bo-na'ceous** (kár'bó-ná-shús), *adj.* Pertaining to, containing, or composed of carbon.

**car'bo-na'do** (-ná'dó), *n.* *pl.* -DOES or -DOS (-dóz). [From *Sp.*, fr. *L.* *carbo* coal.] A broiled or grilled piece of meat or fish, scored before cooking. — *v. t.* -POED (-dóed); -PO'ING (-dó'ing). 1. To make a carbonado of. 2. To hack or slash.

**car'bo-na'do** (-ná'dó), *n.* [*Pk.*, carbonated.] An opaque dark-colored diamond found in Brazil, used esp. for cutting and drilling hard materials.

**Car'bo-na'ri** (kár'bó-ná-rí), *n.* *pl.* & *sing.* (rare) -NARO (-ró). [*It.*, charcoal burners.] A secret political association organized in Italy early in the 19th century to establish a republic.

**car'bon-ate** (kár'bón-át), *n.* [*F.* *Chem.* A salt or ester of carbonic acid; as, carbonate of lime (= **CALCIUM CARBONATE**); carbonate of soda (= **SODIUM CARBONATE**). — (-ít), *v. t.* 1. To burn to carbon. 2. *Chem.* a) To convert into a carbonate. b) To impregnate with carbonic acid (as, carbonate of lime) or carbon dioxide (as, carbonated water). Cf. **AERATE**, *v. t.* 1. — **car'bon-a'tion** (-é'shán), *n.*

**carbon bisulfide.** Carbon disulfide.

**carbon black.** Specif., *as black*.

**carbon copy.** A copy made with carbon paper; hence, an exact duplicate; a replica.

**carbon dioxide.** *Chem.* A heavy colorless gas,  $\text{CO}_2$ , extinguishing flame. Water charged with it becomes the soda water of the shops and the carbonated water of natural springs. Plants use it in photosynthesis, retaining the carbon for food material and giving out the oxygen.

**carbon disulfide.** A colorless inflammable liquid,  $\text{CS}_2$ , used as a solvent for rubber, etc., as an insecticide, etc.

**car'bon'ic** (kár'bón'ík), *adj.* *Chem.* a) Of, pertaining to, or obtained from carbon. b) Designating an acid (carbonic acid,  $\text{H}_2\text{CO}_3$ ), existing only in solution and reacting with bases to form carbonates.

**car'bon'ic-ac'id gas.** Carbon dioxide.

**car'bon-if'er-ous** (kár'bón-if'er-ús), *adj.* [*Carbon* + -ferous.] 1. Producing or containing carbon or coal. 2. [*cap.*] *Geol.* Of, pert. to, or designating the period of the Paleozoic era between the Devonian and the Permian, or the system of rocks formed during this period; — so called from the coal beds in the system. By some divided into the *Lower Carboniferous* or *Mississippian* and the *Upper Carboniferous* or *Pennsylvanian* (containing the coal measures: which see). — **Car'bon-if'er-ous**, *n.*

**car'bon-ize** (kár'bón-íz), *v. t.* 1. To convert into a residue or carbon, as by fire; to char. 2. To impregnate, cover, or combine with carbon. — **car'bon-i-za'tion** (-íz-á'shán; -íz-á'-n), *n.*

**carbon monoxide.** *Chem.* A colorless odorless gas,  $\text{CO}$ , a product

of the incomplete combustion of carbon. It burns with a pale-blue flame, forming carbon dioxide. It is very poisonous.

**carbon paper** *n.* A thin paper coated with a preparation of lampblack, or of some color, used in making copies. Pressure on the back causes the color to be transferred to paper laid against it. **b** See CARBON PROCESS.

**carbon process** *Photog.* A printing process depending on the effect of light on bituminous gelatin. Paper coated with a mixture of the gelatin and a pigment is called **carbon paper** or **carbon tissue**.

**carbon tetrachloride** *Chem.* A colorless noninflammable liquid,  $CCl_4$ , of chloroformlike odor, used as a solvent and detergent, and as a fire extinguisher.

**carbonyl** (*kār'bōn-yl*; -īl), *n.* [From *carbon* + *-yl*.] **Chem.** A bivalent radical  $CO$ , occurring in aldehydes, ketones, organic acids, etc. **b** A compound of this radical with a metal; as, *nickel carbonyl*,  $Ni(CO)_4$ . — *carbonyl* (*-īl*), *adj.*

**Car-bo-run'dum** (*kār'bō-rūn'dūm*), *n.* A trade-mark for certain abrasives.

**carb-ox-yl** (*kār'bōk-sīl*), *n.* [From *carbon* + *oxygen* + *-yl*.] **Chem.** The univalent radical  $CO_2H$ , the characteristic group of most organic acids, as formic, acetic, benzoic acids, etc. — *carb-ox-yl* (*kār'bōk-sīl*), *adj.*

**carb-oy** (*kār'bōi*), *n.* [Per. *garabāh*.] A very large glass bottle enclosed in a box, or wickerwork, for corrosives. Cf. *DEMIOJON*.

**carbun-ole** (*kār'būn-k'ōl*), *n.* [UNF., fr. *carboneolus*, dim. of *carbo* coal.] 1. Formerly, any of several red precious stones, as the ruby; now, the garnet cut cabochon. 2. **a Med.** A painful local inflammation of the subcutaneous tissue, larger and more serious than a boil. **b** A pile, or red spot, due to intemperance. 3. A brown, reddish-yellow hue, of low saturation and low brilliancy. See *COLOR*. — *carbun-ol-iar* (*kār'būn-k'ōl-ēr*), *adj.*

**carbun-ret** (*kār'bū-rēt*), *n.* [From *CARBON*.] A carbide. — *v. t.*: *RET-ED* or *RET-ED* (*-rēt'ed*); *RET-ING* or *RET-ING*. 1. To combine chemically with carbon. 2. To charge with volatile carbon compounds; as, to *carburet* air or gas by passing it through a light petroleum oil. — *carburetion* (*-rēt'shūn*), *n.*

**carbureto-ant** (*-rēt'ant*), *n.* A carbureting agent.

**carburetor**, **carburetor** (*-rēt'or*; *-rēt'ōr*), *n.* An apparatus in which air or gas is carbureted.

**carburi-ze** (*-rīz*), *v. t.* 1. To combine or impregnate with carbon. **b** = *CARBURIZE*, *v. t.* 2. — *carburi-za-tion* (*-rī-zā'shūn*; *-rī-zā'shūn*), *n.*

**car-ca-jou** (*kār'kā-jō*; -zhō), *n.* [Can. F. corr. of *carcajou*, an Indian name of the wolverine.] The wolverine; also, the Canada lynx, the cougar, or the badger of North America.

**car-ca-net** (*kār'kā-nēt*), *n.* [Dim fr. F. *ML. carcannum*.] A chain. An ornamental chain, necklace, collar, or, sometimes, headband, usually golden or jeweled.

**car-cass** (*kār'kās*), *n.* *pl.* *CARCASSES* (-ēs; -z). Also *car'caso* (*kās*). [From F., fr. *It. carcassa*.] 1. A dead body of a beast or (in contempt) of a man; esp., the dressed body (trunk) of an animal slaughtered for food. 2. *Contemptuous*. The living body. 3. The worthless or decaying remains of a great and once comely or vital thing; the shell or husk; as, a ship's *carcass*. 4. **Chem.** The foundation structure of a pneumatic tire. See *TIRE*, *ILLUSTR.*

**car-ci-o-gen** (*kār'sīō-jēn*, *kār'sīō-nō-jēn*), *n.* [Gr. *karkinos* cancer + *-gen*.] Any cancer-producing substance.

**car-ci-no-ma** (*kār'sī-nō-mā*), *n.* *pl.* *-NOMATA* (-mā-tā), *-NOMAS* (-māz). [L., fr. Gr. *karkinos* cancer, fr. *karkinos* crab. See *OMA*.] A form of cancer consisting of a malignant growth originating in epithelial tissue. See *CANCER*, *SARCOMA*. Many varieties are distinguished. — *car-ci-nom'a-tous* (*nōm'a-tūs*; *nōm'a-tūs*), *adj.*

**card** (*kārd*), *n.* [F. *carte*, fr. L. *charta* paper, fr. Gr. *charis* a leaf of paper.] 1. A playing card. 2. *pl.* A game or games played with cards; card playing, — often construed as a singular. 3. **chrom'a** (krô'mă), *n.* [Gr. *chrôma* color.] That quality of color which embraces hue and saturation together (see *color*, 2). White, black, and grays have no chroma. — *Syn.* See *color*.

**chrom'ate** (krô'măt), *n.* A salt of chromic acid.

**chrom'at'ic** (krô'măt-ik), *adj.* [From *L.* fr. Gr. *chrômatikos* suited for color (fr. music, chromatic), fr. *chrôma* chroma, color.] 1. Of or pertaining to color or colors. 2. *Music.* Involving the use of tones foreign to a given mode or key. — applied to harmony utilizing freely the half-step interpolations in the diatonic scale. *b* Of, pert to, or giving all tones of, the chromatic scale. — *n.* *Music.* In full chromatic sign. An accidental. — **chrom'at'ic-al-ly** (-i-kăl-i), *adv.*

**chrom'at'ics** (krô'măt-iks), *n.*; see *-ics*. The branch of colorimetry which treats of hue and saturation. — **chrom'at'ist** (krô'măt-ist), *n.* **chromatic scale.** *Music.* The diatonic scale with the five intermediate semitones.

**chrom'a-tin** (krô'măt-in), *n.* [Gr. *chrôma*, *chrômatos*, color.] *Biol.* A deeply staining protoplasmic material occurring in the nucleus of cells. Chromatin exists in small granules and is regarded as the physical basis of heredity. It consists largely of protein compounds of nucleic acid. See *cell*, *ovum*, *illust.*

**chrom'a-tism** (-iz-m), *n.* [Gr. *chrômatismos* a coloring.] 1. *Bot.* Abnormal coloration of the normally green parts of plants. 2. *Optics.* See *ABERRATION*, *n.*, 4.

**chrom'a-to** (krô'măt-ô), *chromat-* [Gr. *chrôma*, *chrômatos*, color.] A combining form denoting: *a* Color, as in *chrom'a-to-pho'la* *b* Chromatin, as in *chromatolysis*. *c* Pigment, pigmentation, as in *chromatophore*.

**chrom'a-to-ra-phy** (-tô'ră-fî), *n.* *Chem.* A separating of closely related compounds by allowing a solution of them to seep through an adsorbent so that the different compounds become adsorbed in separate colored layers comprising a **chrom'a-to-gram** (krô'măt-ô-grăm').

**chrom'a-to-ly-gy** (-tô'lô-jî), *n.* [*chromato + -logy*.] The science of, or a treatise on, colors.

**chrom'a-to-ly-sis** (-tô'lô-sîs), *n.* [NL., fr. *chromato + -lysis*.] *Med.* Solution and breaking up of chromatin.

**chrom'a-to-phore** (krô'măt-ô-fô-rî; 70), *n.* [*chromato + -phore*.] 1. *Zool.* A pigment cell, esp. one causing skin-color changes by varying its form or arrangement of pigment. 2. *Bot.* A color plastid, as a chloroplast or chromoplast. — **chrom'a-to-phor'ic** (-fô-rîk), *adj.*

**chrome** (krôm), *n.* [Fr. *chrome* color.] 1. Chromium. 2. *Dyeing.* Potassium (or sodium) dichromate. 3. Short for *chromes*, yellow, chrome steel, etc. — *v. t.* To treat with a compound of chromium, as in dyeing.

**chrome** (krôm), [*Gr.* *chrôma* color.] A combining form meaning: *a* Color or colored, as in *polychrome*. *b* Chromium, as in *ferrochrome*. *c* Coloring matter, as in *monochrome*.

**chrome alum.** *Chem.* Any alum in which chromium is the trivalent metal. Specif., a dark-violet salt,  $KCr(SO_4)_2 \cdot 12H_2O$ , used in tanning and as a mordant in dyeing.

**chrome red.** Any of several pigments consisting of basic lead chromate, or *chromium*, steel. An alloy steel containing chromium, commonly 0.5 to 3 per cent, and high in carbon. It is very strong and can be made extremely hard.

**chrome yellow.** A pigment consisting essentially of neutral lead chromate,  $PbCrO_4$ .

**chrom'ic** (krô'mik), *adj.* *Chem.* *a* Of, pertaining to, or derived from, chromium; — said esp. of compounds in which this element is trivalent. *b* Designating an acid (chromic acid,  $H_2CrO_4$ ), analogous to sulfuric acid, forming well-known salts, the *chromates*.

**chrom'ite** (krô'mit), *n.* *Mineral.* A mineral of the spinel group, composed of iron, chromium, and oxygen,  $FeCr_2O_4$ , valuable as a source of chromium.

**chrom'i-um** (krô'mi-ŭm), *n.* [NL. See *CHROMA*.] A grayish-white metallic element, hard and brittle, and resistant to corrosion. Symbol, Cr; at. no., 24; at. wt., 52.01. Chromium is used in chrome steel and various alloys, and as a plating.

**chrom'ose** (krô'mô), *chrom-* [Gr. *chrôma* color.] A combining form denoting: *a* Color as in *chromosome*. *b* *Chem.* A colored compound as distinguished from its colorless isomer. *c* Pigment; pigmentation; as in *chromocyan*. *d* Chromium.

**chrom'o** (-mô), *n.*; pl. *-môs* (-môs). A chromatolithograph.

**chrom'o-gen** (krô'mô-jên), [*chromo + -gen*.] 1. *Biochem.* A substance which, as by contact with air, readily becomes a coloring matter. 2. *a* A compound not itself a dye, but containing one or more color-forming groups and so capable of becoming a dye. *b* Any of several mordant dyes. — **chrom'o-gen'ic** (jên'ik), *adj.*

**chrom'o-lith'o-graph** (-lith'ô-grăf; 9), *n.* A picture printed in colors from a series of stones prepared by the lithographic process. — **chrom'o-lithog'ra-phy** (-lith'ô-gră-fî), *n.* — **chrom'o-lithog'ra-pher** (see *LITHOGRAPHER*), *n.* — **chrom'o-lith'o-graph'ic** (-lith'ô-grăf'ik), *adj.*

**chrom'o-pho'to-graph** (-tô'tô-grăf; 9), *n.* A photograph in which the natural colors are reproduced. — **chrom'o-pho'to-gra-phy** (-tô'tô-grăf'î), *n.* — **chrom'o-pho'to-graph'ic** (-tô'tô-grăf'ik), *adj.*

**chrom'o-plasm** (krô'mô-plăz-m), *n.* = **CHROMATIN**.

**chrom'o-plast** (-plăst), *n.* [*chromo + -plast*.] *Biol.* A pigmented plastid; in botany, one containing red or yellow pigment (as distinct from *chloroplast*, containing green pigment). Chromoplasts give color to most flowers and fruits.

**chrom'o-some** (sôm), [*chromo + -sôma*.] *Biol.* One of the small bodies, ordinarily definite in number in the cells of a given species, into which the chromatin of a cell nucleus resolves itself previous to the mitotic division of the cell. See *MITOSIS*, *CHROMATIN*, *SEX CHROMOSOME*.

**chrom'o-sphere** (krô'mô-sfîr), *n.* [*chromo + -sphere*.] *Astron.* A ruddy gaseous layer of incandescent hydrogen, helium, etc., surrounding the sun and between it and the corona (see *CORONA*, 3); also, a similar layer encircling a star. The solar chromosphere is visible at the time of a total eclipse. — **chrom'o-spher'ic** (-sfîr'ik), *adj.*

**chrom'ous** (krô'miŭs), *adj.* [*Chem.* Of, pertaining to, or derived from chromium; — said esp. of compounds in which this element is bivalent.

**chron'ic** (krôn'ik), *adj.* [*F.* *chronique*, fr. *L.*, fr. Gr. *chronikos* concerning time, fr. *chronos* time.] 1. Continuing for a long time; of a disease, of long duration; — opposed to *acute*. 2. Hence, having long had an affliction or habit; confirmed; as, a *chronic* sufferer. 3. Continuous; constant; as, *chronic* war. — *Syn.* See *INVERTERATE*.

**chron'ic-al** (-kăl), *adj.* Rare. — **chron'ic-al-ly**, *adv.*

**chron'ic-le** (krôn'ik-lî), *n.* [*OF.* *chronique*, fr. *L.*, fr. Gr. *chronika*, neut. pl. of *chronikos*. See *CHRONIC*.] A historical account of events in the order of time, a history; esp., a simple chronological record. — *v. t.*; -i-CLÉD (-k'îd); -i-CLING (-klîng). To record in a chronicle; to record. — **chron'ic-ler** (-klîr), *n.*

**Chron'ic-les** (krôn'ik-lî), *n.* pl., construed as sing. Either of two canonical books of the Old Testament. See *HINT*.

**[chro'nique' scan'dal'euse'** (krô'nîk' skăn'dă-lô'z). [*F.*] A history or report that stresses scandalous details.

**chron'o-** (krôn'ô), *chron-* [Gr. *chronos*.] A combining form denoting time, as in *chronometer*.

**chron'o-gram** (-grăm), *n.* [*chrono + -gram*.] 1. An inscription, sentence, or phrase in which certain letters express a date or epoch. 2. The record made by a chronograph. — **chron'o-gram-mat'ic** (-grăm-măt'ik), *adj.*

**chron'o-graph** (-grăf; 9), *n.* [*chrona + -graph*.] An instrument for measuring and recording time, velocity of projectiles, etc. — **chron'o-graph'ic** (-grăf'ik), *adj.*

**chron'o-log'er** (krôn'ô-lô-jîr), *n.* A chronologist.

**chron'o-log'ic** (krôn'ô-lô-jîk), **chron'o-log'ic (-i-kăl), adj.** Pertaining to chronology; containing an account of events in the order of time. — **chron'o-log'ic-al-ly**, *adv.*

**chron'o-lô-gist** (krôn'ô-lô-jîst), *n.* A person who investigates dates of events; one skilled in chronology.

**chron'o-lô-gy** (-jî), *n.*; pl. *-ô-gîs* (-jîz) [*chrona + -logy*.] 1. The science which treats of measuring time by regular divisions, and which assigns to events their proper dates. 2. A chronological table, list, etc. 3. Arrangement or relation of events, in order of occurrence.

**chron'om'e-ter** (krôn'ôm-ê-tîr), *n.* [*chrona + -meter*.] An instrument for measuring time, a timepiece, esp. one intended to keep time with great accuracy. — **chron'o-met'ric** (krôn'ô-mêt'rik), **chron'o-met'ri-cal** (-i-kăl), *adj.* — **chron'o-met'ri-cal-ly**, *adv.*

**chron'om'e-try** (-trî), *n.* The art of measuring time; the measuring of time by periods or divisions.

**chron'o-scope** (krôn'ô-skôp), *n.* [*chrona + -scope*.] Any one of various instruments of precision for measuring minute intervals of time.

**chro'ous** (krô'ôs), [*Gr.* *chrôa*, *chroos*.] An adjective suffix denoting colored; — chiefly in *Bot.*, as in *isochroous*.

**chrys'a-lid** (krîs'ô-lîd), *n.* A chrysalis. — **chrys'a-lid**, *adj.*

**chrys'a-lis** (lîs), *n.*; pl. *chrys'alides* (-lîs-êd; -îz), *chrysalides* (krîs'alî-dîz). [*Chrysalis* gold-colored pupa of a butterfly, fr. Gr. *chrysalis*, fr. *chrysa* gold.] *Zool.* The pupa of insects (esp. of butterflies). See *PUPA*, *illust.*; cf. *COCOON*.

**chrys-an'them-um** (krîs'ăn'thêm-mûm; krîs-), [*L.*, fr. Gr. *chrysanthemum*, fr. *chrysa* gold + *anthemon* flower.] An ornamental plant (genus *Chrysanthemum*) of the aster family; also, one of its large red, yellow, or white double flower heads of various shades and sizes. See *POMPON*, 2.

**col·or**, **col·our** (kŏl'ŭr), *n.* [OF. *color*, *colour*, fr. L. *color*.] 1. A quality of visible phenomena, distinct from form and from light and shade, such as red, blue, etc.; also, a variety of this quality; a hue, a sensation evoked as a response to the stimulation of the eye and its attached nervous mechanisms by radiant energy of certain wave lengths and intensities. All colors are divisible into two classes: *chromatic colors*, as reds, greens, purples, browns, and pinks; *achromatic colors*, including black, white, and the series of grays intermediate between black and white, which differ from each other only in the degree of resemblance to white or difference from black. *Brilliance* is the attribute which measures this variation among the grays. Dark grays have *low*, median gray *medium*, and light grays *high*, brilliance. Chromatic, as well as achromatic, colors differ from each other in brilliance. Chromatic colors differ from each other also in hue and saturation. Thus, any color can be specified in terms of these three attributes, hue, saturation, and brilliance. Hue is that attribute in respect to which colors may be described as red, yellow, green, or blue, or as intermediate between two of these, as, red-yellow denotes a hue equally resembling red and yellow. Saturation is that attribute in respect to which colors may be differentiated as being higher or lower in degree of vividness of hue; that is, as differing in degree from gray. Thus, a gray is a color, yellow is a color, blue is a color, and so on. A color, yellow, in hue, of medium saturation and medium brilliance. Certain standard analyses showing sets of *primary colors*, that is, colors in terms of which all other colors may be described or from which all other colors may be evoked by mixture, differ from the above; as, the *physiological*, or *fundamental*, *primaries* are red, green, and blue; the *psychological* *primaries* are red, yellow, green, blue, black, and white; in painting, red, blue, and yellow are the *primaries*. 3. Specif., a chromatic color. 4. Complexion; specif.: a healthful or ruddy complexion. 5. A blush. 6. The hue or complexion of men not classed as white; esp., the complexion of Negroes. 7.
